Set Up & Pairing

Thank you so much for choosing Editors Keys. We know you can't wait to start using your new keyboard so well keep this guide as small as possible. Follow the simple instructions below to get up and running.

- **Turn On Your Keyboard**

  Flick the switch at the back right hand side of the keyboard – the power indicator should light up for around 3 seconds,

- **Activate Bluetooth Channel**

  Press and hold the Bluetooth 1 key until the keys white indicator light begins to quickly flash. The keyboard is now searching for available devices to connect to.

- **Connect First Device**

  Head to the Bluetooth settings of your first/preferred device and look for the name 'Bluetooth Keyboard! and click to connect. Once successfully paired the keys light should stop flashing and briefly show as solid white before turning off.

- **Set Keyboard Configuration**

  Once paired you may be prompted to select a specific language/ configuration. Make sure you select the language that matches the layout of your keyboard.

Pairing Multiple Devices

If you'd like to pair your keyboard with a second or third device simply follow the previous instructions using the Bluetooth 2 and then Bluetooth 3 buttons instead.

- **Hold To Search**

  Hold down the Bluetooth 2 key until it flashes, then pair the keyboard to your second device. The light will then stop flashing and briefly show as solid white before turning off .

- **Repeat and Complete**

  Repeat this step for your third device using the Bluetooth 3 key.

Notes For General Usage

- **One Device At A Time**

  Three devices can be connected simultaneously for the ease of switching between devices but you can only type via one channel a ta time .

- **Switching Between Devices**

  Simply hit the Bluetooth channel key associated with a certain device to instantly connect the keyboard to that channel. Ensure the device and its Bluetooth are both switched on.

- **Pairing Mode**

  When in pairing mode if you d o not p air to a new device within three minutes the keyboard will stop connecting.

Let There Be Light!

Once a device, or multiple devices, are connected you can enable and alter your keyboards backlighting.

- **Locate Backlight Key**

  Your backlight key will be next to your right Control (or Ctrl) key and will display the icon below.

- **1Tap** ☼

  Hitting the key once will activate your backlighting.

- **2Taps** ☼ ☼

  Hitting the key twice will increase its brightness.

- **3 Taps** ☼ ☼ ☼

  Hitting the key three times will increase brightness further,

- **4 Taps** ☼ ☼ ☼ ☼

  Hitting the key four times will deactivate the backlight.

- **Energy Saving Mode**

  If idle for 30 minutes or more your keyboard will enter energy saving mode. To reactivate your keyboard simply

hit any key and wait a few seconds for it to wake up,

Keep it Charged.

If your indicator light is flashing red then it's time to charge the keyboard using the cable provided. Once on charge the light will change to solid red and then eventually to green once fully powered.
