**PH3605 Phaser Guitar Effect Software** 

## Thank you for choosing Kuassa products!

We encourage you to take the time to read this User Manual thoroughly to ensure trouble free and proper operation of the software.

Following the previous Efektor Distortion series, please welcome the newest addition to the Efektor series: Efektor Modulation. We studied and examined more than 20 models of fabled modulation effects from the 1950s to the last decade. From rack gears, desktop units, and effect pedals as well. Modulation effects are widely used by organ/synth players, guitarists, and studio engineers to add width, depth, and movement to the original sound. In this latest bundle, we collect the prominent ones and packed them into four devices.

Full name, phase shifter. Typically more subtle than flanger, but sounds like warbles coming from outer space. Often used on Rhodes electric piano, and of course by uitarists such as Brian May (Queen) and Eddie Van Halen (Van Halen).

- Phase One: Mild phasing effect, great for clean tone. Less dramatic sweep.
- Dual Phase: Warm and thick phasing sound that sounds great with distorted guitar tones. Great for many instruments such as guitar, bass, keyboards, and vocals.
- Multi Phase: More intense effect . Offers more than a standard wobbling effect.

# **Key Features:**

- Three modes of Modulation in every units.
- Bypass switch button.
- BPM sync.
- Mono or stereo mode.
- CV inputs for automation (RE Only)

# **Preset Management**

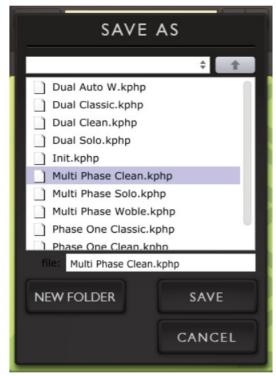

- 1. Presets for EFEKTOR Plug-in(s) are located in the following folders\*:
  - Mac: Users/[YourName]/Music/Kuassa/Presets/EfektorPH3605
  - Win: ~\Documents\Kuassa\Presets\EfektorPH3605

All presets inside these folders will be recognized by the plugin as individual presets, you can also create a folder to group the preset(s). They will thus be shown on the EFEKTOR Plug-in's preset selector.

- 2. To save a preset, set your plugin to the desired parameter settings, then select:
  - "Save Preset": Overwrites currently active preset.
  - "Save Preset As": Saves current settings into a new preset file (\*.kphp for PH3605).

3. When you create a new preset using "Save Preset As...", make sure that you have chosen the correct preset folder as aforementioned on point 1 above to make sure that it will be recognized automatically by EFEKTOR plug-ins.

4. To add new additional preset banks, create a new folder by clicking "New Folder" button and rename it. Subfolders are also recognized to manage presets into groups, useful to manage additional preset bank, or grouping presets based by their use.
