Connecting the DVD Player

Video system connection

Composite Video
Use the AV cable (yellow terminal) to connect the composite video output of this unit to the TV/monitor video input.

Component Video
Use a 3-core AV cable to connect the component output terminals of this unit to the corresponding TV/monitor input.

HDMI Output
Use an HDMI cable to connect the HDMI output to the HDMI input terminal.

Note!

- Which connection to use depends on the TV/monitor input terminal.

- Do not use all the connections at one time, otherwise, the picture will be affected.
- Only the physical connection conforms to the video setting and can produce the normal picture. (Please refer to the Video Setup in System Setup)

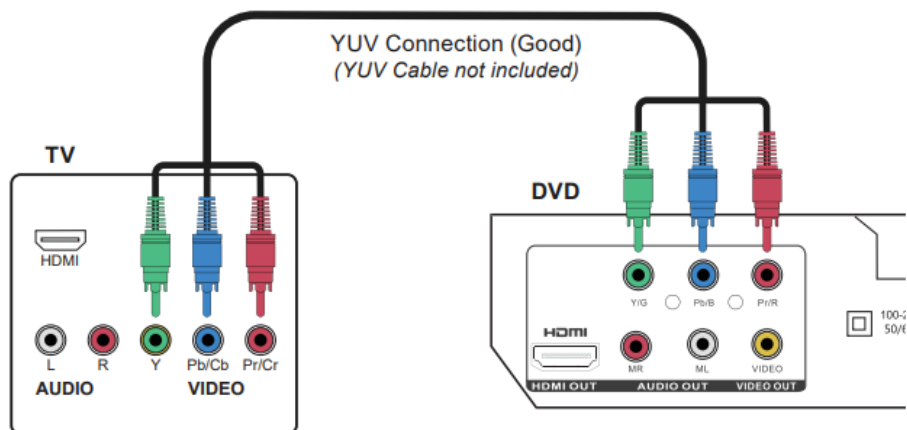

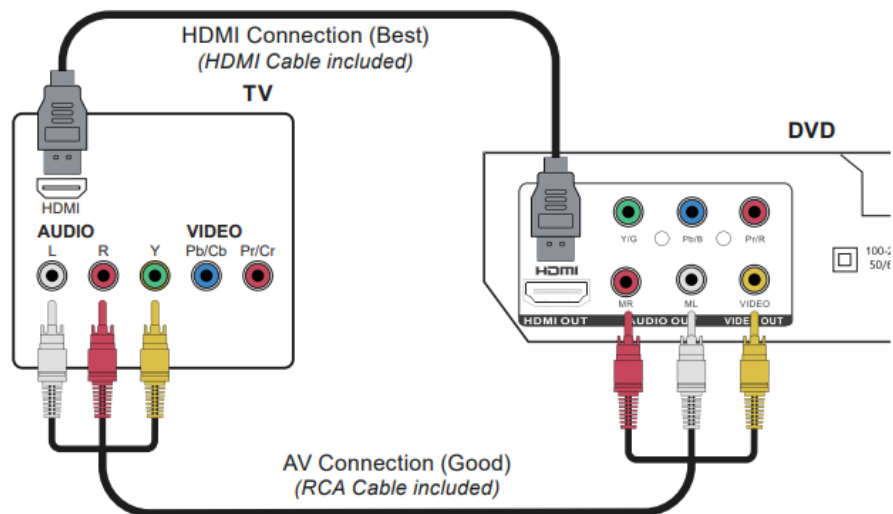

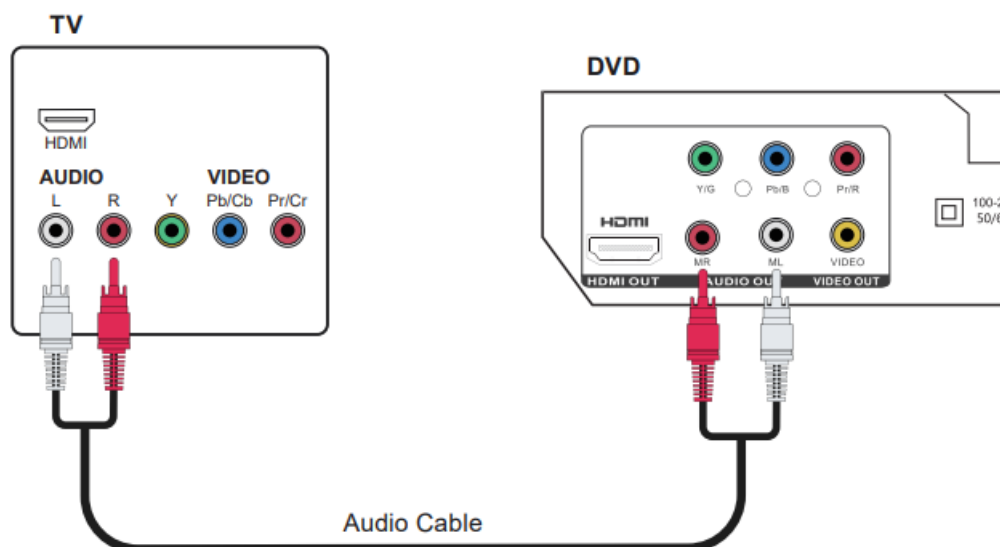

Audio connection system

Stereo Audio
Use a pair of AV cables (red for the right/white for the left) to connect the stereo audio output of this unit to the TV if you want to have sound from the TV.

Note!

- The physical connection should match with audio output setup of this unit. Please refer to Audio Setup in System Setup.

Audio Cable

Setting the DVD Player

Basic Operation

Press **SETUP** the remote control unit to set up the initial setting, and select related[SETUP PAGE] with the directional buttons.

Menu Operations
You can set up the mode of audio and video output, initial setup, parental control level, etc. You can also select the aspect ratio of the playback picture to your TV screen. Pres **SETUP** display the setup menu and the system will automatically stop play.

System Setup

Press **SETUP** and select system setup page.

- **TV SYSTEM:** Use ▲ ▼ arrow buttons to make TV system selection. There are four TV output systems to choose from: NTSC, PAL, PAL-M and AUTO.
- **HD OUTPUT**: Use ▲ ▼ arrow buttons to set video resolution, there are three resolution(720P, 1080I, 1080P).
- **VIDEO:** There are different video output modes to choose from:
- **INTERLACE-YUV**: Use Y Cb Cr terminals to output signals.
- **P-SCAN YPBPR**: Use Y Cb Cr terminals to output signals and convert to progressive output.
- TV TYPE: Using ▲ ▼ arrow button to select TV aspect ratio.

4:3/PS

16:9

Wide screen video output for a wide-screen TV set.

PASSWORD

The initial setting of this item is under locked status. You can not set the rating and also can not change the

password. Input the initial password: 0000 **0/10** and press **ENTER** confirm and then you can set the rating and change the password.

RATING

Playing some DVD discs can be limited depending on the age of the users. The parental control function allows the playback limitation level to be set by the parent from level 1 to level 8. The level is from high to low. Level 1 is the lowest level and level 8 is the highest lever. This function is only valid for some DVD discs that have a limit level. And you should set the password first and make sure the password lock is locked.

DEFAULT

Use the arrow button to select [RESTORE] and press **ENTER** return all the settings of the system to the original settings.

Language Setup

- OSD LANGUAGE
- AUDIO LANGUAGE
- SUBTITLE LANGUAGE
- MENU LANGUAGE

Use ▲ ▼ arrow buttons to select desired language and press confirm. **ENTER** to confirm.

If the selection is invalid, it means that the language is not available for this disc.

Audio Setup

AUDIO OUT

Use ▶ arrow button to select the audio output way.This is the way for you to select SPDIF/OFF, SPDIF/RAW, SPDIF/PCM.

KEY.

Press ▲ ▼ to adjust the tone level.

Video Setup

- BRIGHTNESS
- CONTRAST
- HUE
- SATURATION

- SHARPNESS

Use ▲ ▼ to adjust the corresponding value of the video output.

Speaker Setup

- **DOWN MIX LT/RT**: When you play a disc that has the logic effect, you can choose LT/RT output. The disc information will be decoded and show a better effect.
- **STEREO**: When 2ch output is selected, normal stereo signals may be played from the L&R output socket.

Digital Setup

OP MODE

LINE OUT: The input signals are linearly compressed and the volume is lower. You should rather choose LINE OUT setting at night.
RF REMOD: The volume is higher and adapts to daytime use.

DYNAMIC RANGE
When you choose LINE OUT mode, select DYNAMIC RANGE to adjust the compression ratio and you can get different effects. When you adjust to FULL, the compression ratio will be set to the lowest level. When adjust is OFF, the compression ratio will be set to the lowest level.

DUAL MONO
You can set the audio output mode for Left or Right channel. There are four modes: STEREO, MONO L, MONO R, and MIX MONO.

Playing the DVD Player

Playable file format

Supported discs format:
DVD, DVD+RW, DVD-RW, DVD+R, DVD-R, HDCD, VCD, CD, CD+R, CD-R, MP3 Music CD, Super VCD, CD-R/-RW

| DVD Video	DVD-Video format
DVD-R	DVD-Video format
DVD-RW	DVD-Video format
CD-Audio	CD-DA, Video CD, Super Video CD
CD-R	CD-DA, JPEG, MP3
CD-RW	Video CD, Super Video CD
USB	MP3, JPG

Note!

- It may not be able to play all the media discs in some cases due to the type of discs (Especially for those DVD±R/RW discs), of which the method or device of the recording and how these files were created would distort the original contents and format.
- This unit does not guarantee the connection with all USB devices.
- The USB port does not support USB charging.
- FAT and FAT32 file systems are supported.

Play Picture CD Disc

Press ▲▼◄► to select the desired picture.

Play MP3 Disc

- When playing a MP3 disc, there is a menu screen on TV press the [▲] or [▼]] button to shift the cursor to select the track or folder and press the **ENTER** button to play the selected track or folder (it needs to enter the sub-folder to select the track and press the **ENTER** button to play for some MP3 discs).
- Also use the digit button to select the track.

USB Operations

- Remove the DVD/CD disc from the tray, and insert the USB drive into the USB jack. The player will automatically detect the readable files in the USB drive. Use the remote control to select the files for playback. (USB file unreadable means no supported file in USB.)

CD Ripping
The product has CD-ripping functions.

- Put a CD into the disc tray and then plug in a USB drive.
- Press **CD RIPPING** key on the remote. A CD rip menu will be shown on the TV screen.

```
RIP  CD -  TO MP3

                          ENCODER OPTIONS
                    SPEED 1X
▶ OPTIONS           BITRATE            128KBPS
  TRACKS
                               FILE OPTIONS
  START             CREATE ID3  TAG         ⊠
  QUIT              CREATE PLAYLIST         ⊠

                         STORAGE OPTIONS
                    STORAGE             USB
```

Options

- First, select the copying SPEED normal or fast when normal is selected, you can listen to the music while

copying is in process. When fast is selected you will only see the copy process in the TV screen.

- Second, select the BITRATE. Usually, a 128K rate is used.
- Third, CREATE ID3 TAG. If the CD music files have the song name or singer name, you can build the ID3 information.

Tracks

- Move the cursor to the right-hand side. Select the song that you want to record. When it is selected, a Tick will be shown. If you move the cursor down to choose Select All, all the songs on the list will be copied. If selected none is chosen, any selected songs will be canceled. Move the cursor to the left side to select Start, press **ENTER** to confirm. Then the copying will start.
- You will see the next menu page which shows the copying is in process. Move the cursor to the left side to select QUIT, pres **ENTER** key.
- Exit RIPPING function.
- Play MP3 songs, press the **CD RIPPING** button, put MP3 songs directly copied to the USB device.
- MP4 video playback, in the stop state, press the **CD RIPPING** button, video to MP4 directly copied to the USB device.

Note

1. Make sure the USB drive has enough memory space for the music files.
2. The copied files are in MP3 format only.
