USE INSTRUCTION
Terminal Address Programmer

PRG.PAS.MCS
170 x 112 x 35 mm/ 270 g
Plastic case + mechanical keyboard 0°C … 45°C – IP 31
Power supply: 9V (battery/rechargeable battery)
Connection to the terminal via UTP Patch Cable 0.25 cm
Addresses available for programming: between "000" and "998"   Typing "999" ends the address programming.

DESCRIPTION

The **PRG.PAS.MCS** programmer allows the programming of the address (apartment number) for all types of terminals in the **Classic Line** range: PAS.17A, PAS.27X, PAS.37X, MCS.47X.

This programmer serves as the mobile alternative to the terminal address programming function, enabling the address to be programmed both on-site and in the office, by a single person.

CONNECTION TO THE TERMINAL

1. UTP Patch Cable 0.25 cm
2. Back
3. Front
4. PRG.PAS.MCS Programmer
5. Terminal video – audio (MCS.47X, PAS.27X, PAS.37X)

ON/ OFF

1. The programmer is turned on by pressing the ON key.
2. The programmer turns off:
   – 3 seconds after entering the last digit of the programmed address;
   – 10 seconds after being turned on, if no key is pressed.

PROGRAMMING

Step 1: Connect the programmer to the terminal.

Step 2: Press the **ON** key on the programmer → The display shows **[Adresa post].**

Step 3: On the terminal, press and hold the 🔑 key.

Step 4: On the programmer, enter the terminal address to be programmed (3 digits required). After entering the last digit, the terminal will issue a confirmation beep, and the 🔑 key can be released.
