## **Section 1: Introduction**

### **Product Description**

Your new touchscreen display combines Elo’s latest developments in touch technology and display design with reliability for use in a high-traffic environment.

This touchscreen incorporates a 24-bit color, active matrix thin-film-transistor LCD panel to provide high-quality display performance. The 90 Series offers sizes that range from 10.1-inch to 27 -inch and resolutions that range from 800×600 to Full HD 1920×1080. The LED backlight significantly reduces power consumption and eliminates mercury (compared to CCFL-backlit panels). Other features that enhance this LCD monitor’s display performance are Plug & Play compatibility, remote on-screen display (OSD) controls, and flexible mounting options.

### **Precautions**

Follow all warnings, precautions, and maintenance as recommended in this user manual to maximize the life of your unit and prevent risks to user safety. See the Safety & Maintenance Section for more information.

This manual contains information that is important for the proper setup and maintenance of the unit. Before setting up and powering on your new touchscreen, read through this manual, especially the Installation, Mounting, and Operation Sections.

## **Section 2: Installation**

### **Unpacking the Touchscreen Display**

Open the carton and verify that the following items are present

Japanese language regulatory information pamphlet	VGA cable
Quick Install Guide	USB cable
HDMI cable	Mounting brackets
EEL label	OSD remote

### Connector Panel & Interfaces

\*Please note the COM (Serial) port for touch is only applicable for EXX9XL-XCXX models and removed for the rest models.

With COM (Serial) port

Without COM (Serial) port

### Touchscreen Display Connections

1. Connect the HDMI/DP/VGA video cables between the monitor's HDMI/DP/VGA input connectors and your HDMI/DP/VGA video source. Tighten the video cable's screws for best performance on VGA connector.
2. Connect the USB touch cable between the monitor's USB connector and your PC's USB port.  
\* Or Connect the Serial touch cable between the monitor's COM (Serial) connector and your PC's COM (Serial) port. (Only applicable for EXX9XL-XCXX models)
3. Connect a 12VDC power supply to the monitor's input power jack.
4. The touchscreen display ships in an ON state, video should be displayed on your monitor already.

### Installing the Touch Technology Software Drivers

No additional drivers are required for your projected-capacitive touchscreen displays with Windows 7, 8.1, and 10 or later operating systems, it uses Windows HID drivers. If the monitor is used with Windows XP operating system, follow the below steps to install the Windows XP touch driver. To download the latest touch drivers

1. Visit [www.elotouch.com/Support/Downloads/Driver/DriverDownload/Default.aspx](http://www.elotouch.com/Support/Downloads/Driver/DriverDownload/Default.aspx)
2. Select the "Touch Drivers" from "Product Category" dropdown menu.
3. Select the "Operating System" from "Operating System" dropdown menu.
4. Click on the driver version required for your touchscreen display.

## Section 3: Mounting

## Flush Mount

### Flush-mount Bracket Installation Notes:

Bracket shape varies for each model, drawing for illustration purposes only. See dimensional drawing for exact dimensions.

1. Attach bracket "A" To touchscreen display (all four sides) with M4 screws (included)
2. Attach bracket "C" to customer panel per drawing (all four sides)
3. Attach bracket "B" to bracket "C" on all four sides with M4 screws (included)
4. Adjust the depth of bracket "B" so the monitor is flush with customer panel
5. Place touchscreen display into the customer panel opening
6. Secure touchscreen display to bracket "B" from behind with M4 screws (included)

## Side Bracket Mount

### Side-mount Bracket Installation Notes:

Bracket shape varies for each model, drawing for illustration purposes only. See dimensional drawing for exact dimensions.

## Rear VESA Mount

A four-hole mounting pattern for M4(10mm) screws is provided on the rear of the monitor. The VESA FDMI-compliant counting is coded: VESA MIS-E, C.

	ET109 3L	ET12 911.	ET15 90L	ET15 93 L	ET17 90L	ET1990/1 991L	ET20 94L	ET2293/2294 /2295L	ET2494/2 495L	ET2794/2 796L
75 x 75 mm	X	X	X	X	X	X (depends on different model)				
100×100 mm			X		X	X	X	X		
200×100 mm									X	X

## Section 4: Operation

### Power

The touchscreen display ships in an ON state.

To turn the touchscreen display on or off, press the touchscreen display power button on the OSD controller once. The power status LED on the OSD controller functions according to the following table.

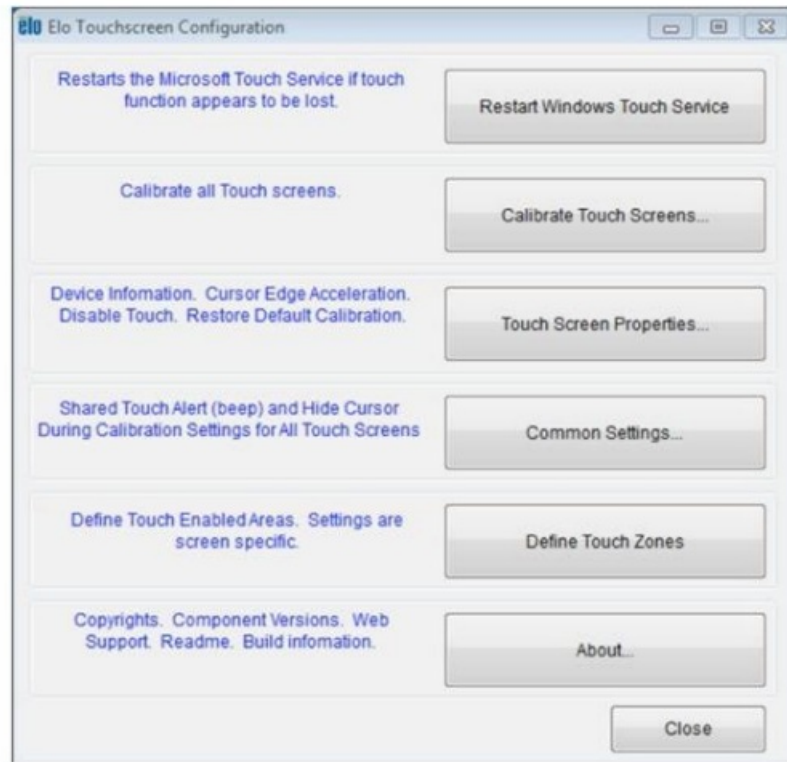

Touchscreen Display/Computer Module Status	LED Status
OFF	OFF
SLEEP	PULSING
ON	ON

The system consumes low power when in SLEEP and OFF modes. For detailed power consumption specifications, refer to technical specifications on the Elo website <http://www.elotouch.com>. Touching the screen will bring the attached host PC out of SLEEP mode (similar to moving the mouse or pressing a keyboard key).

To improve reliability and reduce wasteful power consumption, disconnect the AC power cable from the monitor when long periods of disuse are planned.

### Touch

Your touchscreen display is factory-calibrated and should not need manual calibration (unless the input video is not fully scaled to the native resolution, or the touch experience needs to be calibrated to a specific user).

### IntelliTouch Dual Touch Technology

When connected to Windows 7, 8.1, and 10 or later computers, the touchscreen display can report 2 simultaneous touches. When connected to Windows XP computers, the touchscreen display reports single touch. The IntelliTouch Dual Touch touchscreen can be re-calibrated to your displayed video image, if needed, through the calibration function in the Elo driver control panel.

The IntelliTouch Dual Touch driver will only support multiple monitors if they are all using the IntelliTouch Dual Touch technology.

To use multiple IntelliTouch Dual Touch monitors, double click on the EloConfig desktop shortcut to open up the Elo Touch Configuration screen

Select “Match Touch to Display...” to calibrate multiple monitors.

### Projected Capacitive Touch Technology

When connected to Windows 7, 8.1, and 10 or later computers, the touchscreen display can report 10 simultaneous touches.

When connected to Windows XP computers, the touchscreen display reports single touch.

No additional drivers are required for this technology to work with Windows 7, 8.1, and 10 or later, it uses Windows HID drivers.

Refer to Chapter 2, Section “Installing the Touch Technology Software Drivers” to find instructions to download touch drivers for Windows XP.

### Gesture Support

The IntelliTouch Dual Touch technology enables several gestures that support single and multiple touches. Refer to the Microsoft Website <http://msdn.microsoft.com/en-us/library/dd940543> on the various gestures that are supported in Windows 7.

### Video

A display's native resolution is its width and height measured in number of pixels. Generally, for best performance, an image displayed on this monitor will look best when your computer's output resolution matches this monitor's native resolution.

For computer output resolutions at non-native resolutions, the monitor will scale the video to its panel's native resolution. This involves

stretching or compressing the input image as needed in the X- and Y-dimensions to fit the display's native resolution. An unavoidable byproduct of the scaling algorithms is a loss of fidelity when the computer's output video image is scaled by the monitor to fit the display. This loss of fidelity is most apparent when viewing feature-rich images at close distances (for example images containing small-font text).

Your touchscreen display will likely not require video adjustments. However, for analog VGA video, variations in video graphic card outputs may require user adjustments through the OSD to optimize the quality of the monitor's

displayed image. These adjustments are “remembered” by the touchscreen display. Also, to reduce the need for adjustments for different video mode timings, the monitor correctly scales and displays some of the video industry’s most common video timing modes. Refer to the technical specifications for this monitor at <http://www.elotouch.com> for a list of these Preset Video Modes.

### On-Screen Display (OSD)

Four OSD buttons are located on a wired control box. These can be used to adjust various display parameters. The buttons and their functionality are:

Button	Function when OSD is not displayed	Function when OSD is displayed
Menu	Display OSD Main menu	Return to previous OSD menu
	Display OSD Contrast submenu	Decrease value of selected parameter / select previous menu item
	Display OSD Brightness submenu	Increase value of selected parameter / select next menu item
Select	Display Video Priority submenu	Select parameter for adjustment / select submenu to enter

Using the OSD buttons controls an on-screen graphical user interface that displays on top of your input video, allowing intuitive adjustment of the following display parameters:

Parameter	SAvailable Adjustment
Brightness	Increase/decrease monitor brightness. Default 90 series: tie ste wider 17":100%maximtrn and the sizes over 1T: 75%; 95/96 series :100% maximum
Contact	Increase/decrease mat contrast. Default Best gray-shade performance
Clock	Allow fine adjustment of the panel's pixel dot clock Only applicable for VGA input video
Phase	Allow fine adjustment of the panel's pixel dot dodcphase. Only applicable for VGA inputticle o
AutoMyst	Automatically adjusts the system clod( to the input analog VGA video signal, affecting the H -postition, V-p3sition, Clodc, and Phase menu items. Cralyapplicable for VGA I: put video
H-position	Move the image horizontally on the display in single-pixel increments. Default centered Only applicable for VGA input video
V-position	Move the image vertically on the display in single-pixel increments. Default centered Only applicable for VGA input video
Aspect Ratio	Switch the scaling method between Full Scalkig and Maintain Aspect Ratio. Default: Full Scaling Full Scaling – scale the X- and Y-dimensions of the input video (up or down as needed) to the display's native resolution. Fill To Aspect Ratio- Assaning a landscape orientation and an input video with an aspect ra tio smaller than 16:9, scale the Y-dimension of the input video (up or dour as needed)to the display's Y-resolution and scale the X-dimension to maintain the input video's aspect ratio ( and fills the rest of the display with equal black bars on the left and right). Other touchscreen technologies may need recatation when swatching between Aspect Ra bb options. this function is available only on wide monitors.
Sharpness	Adjust the sharpness of the displayed images. Default no shamnessadjustment Only applicable at non-native input video resolution.
Cola Temperature	Select the display's color temperature. The available odor temperatures are 9300K. 7500K. 6500K. 5500K. and User Defined. If the User Defiled option is selecte the user can change the cot( temperature by changing individual R. G. and B gains on a scale from 0 to 100. Def ault User Defined with R, G., and B all set to 100.

Parameter	Available Adjustment
OSD H-Position	Adjust the horizontal location of the OSD menus on the display. Default: centered
OSD V-Position	Adjust the vertical location of the OSD menus on the display. Default centered
OSD Timeout	Adjust how long a period of OSD button inactivity, the touchscreen display will wait before close the OSD. The adjustable range is between 5 and 60 seconds. Default 15 seconds
OSD Language	Select which language the OSD information is displayed in. The available languages are: English, French, Korean, and German. Spanish. Simplified Chinese, Traditional Chinese. and Japanese. Default English
Recall Defaults	Select "Recall Defaults" restores all factory default settings for OSD-adjustable parameters (except OSD Language) and for Preset Video Mode timings.
Video Priority	The monitor continually scans for active video on the VGA and the Display port comes to class. This adjustment selects which of those input ports should be given priority to be displayed. The options are HDMI Priority, VGA Priority. DP Priority Default HDMI Priority
Touch on Sleep	Touch function enables/disables when the monitor goes into sleep mode. Default On
Touch Through	Switch to support two touches when adding a 6mm thickness glass in front of the original touchscreen with no air gap. Default: Off 'For PCAP with E331967 and E331401, please go to Elo website: <a href="https://www.elotouch.com/support/downloads">https://www.elotouch.com/support/downloads</a> as these are addressed through a configuration file that will need to be loaded.

All touchscreen display adjustments made through the OSD are automatically memorized as soon as they are entered. This feature saves you from having to reset your choices every time the touchscreen display is unplugged or powered off and on. If there is a power failure, the touchscreen display settings will not default to the factory specifications.

#### **OSD and Power Lockouts**

Press and hold the "Menu" and "Down" buttons for two seconds to enable/disable the OSD Locking feature. When the OSD Locking is enabled, pressing any of the Menu, Up, Down, or Select keys will have no effect on the system.

Press and hold the "Menu" and "Up" buttons for two seconds to enable/disable the Power Locking feature. When the Power Locking is enabled, pressing the power switch will have no effect on the system. Temperature Control for 95/96 Series only

The monitor contains a temperature sensor that provides the user with real-time temperature readings. This reading can be found by opening the OSD menu: Information ► System Temperature. If the monitor is operated above the operating temperature limit, the monitor will go into "Thermal Protection Mode." This mode will reduce the backlight brightness to bring the internal temperature back within operating range. While in this mode,

brightness cannot be increased beyond the set value. If the internal temperature decreases below the Thermal Protection Mode temperature for at least five minutes, normal operation is resumed.

When the Thermal Protection Mode is enabled, the following icon will appear in the Main Menu. This will indicate that the Thermal Protection Mode is active.

Icon showing that Thermal Protection Mode is active

If the monitor continues to be operated above the operating temperature limit, the user will be prompted to shut off the monitor within sixty seconds. If the system is not manually turned off within sixty seconds, the touch monitor will automatically turn off to prevent permanent damage to the monitor.

## Section 5: Technical Support

If you are experiencing trouble with your touchscreen display, refer to the following suggestions.

If the problem persists, please contact your local dealer or contact Elo Customer Service. Worldwide technical support phone numbers are available on the last page of this use manual.

### Solutions to Common Problems

Problem	Suggested Troubleshooting
The touchscreen display does not respond when turning on the system	Check that the DC power adaptor is properly connected. Verify the DC power adaptor is functioning.
Monitor display is dim	Use the OSD to increase the brightness. Use the OSD to increase the contrast. * If it happens on 95, 96 Series: Also check if Protection Mode is active, there is a "Exclamation" mark on the Top-Left corner of the OSD main menu. Go to page. 14 for the details.
Monitor display is blank	If the Power Status LED is blinking, the monitor's Computer Module may be in SLEEP mode. Press any key / move the mouse/touch the touchscreen to see if the image reappears. Check that the signal source device is powered on. Check that there are no loose cable connections.
Monitor displays an 'Out Of Range' message	Adjust your computer's resolution/timing mode to be within the allowable timing ranges specified for your touchscreen display (see website for specifications).
Monitor display image looks strange	Adjust your computer's resolution/timing mode to be within the allowable timing ranges specified for your touchscreen display (see website for specifications). Use the Auto Adjust function in the OSD.
Touch functionality does not work	Verify your PC has the latest BIOS drivers installed. Perform the calibration routine provided with the latest BIOS drivers.
The OSD buttons or power button does not respond when pressed	Check to see if the OSD lock or power lock functions are on.

Can't wake on touch	Check to see if the OSD touch-on sleep function is disabled
Only have two touches	Check to see if the OSD touch-through function is on

## Technical Assistance

### Technical Specifications

visit [www.elotouch.com/products](http://www.elotouch.com/products)

for technical specifications for this device

### Support

visit [www.elotouch.com/support](http://www.elotouch.com/support) for technical support

## Section 6: Safety & Maintenance

### Safety

- To avoid risk of electric shock, follow all safety notices and do not disassemble the touchscreen display. They are not user-serviceable.
- The slots located on the sides and top of the touchscreen display case are for ventilation. Do not block or insert anything inside the ventilation slots.
- A three-wire, grounding power cord plug only fits into a grounded outlet. Do not fit or modify the plug into an outlet that has not been configured for this purpose. Do not use a damaged power cord. Only use the power cord that came with your Elo touchscreen display. Use of an unauthorized power cord might invalidate your warranty.
- Ensure that your installation is equipped to maintain the specified environmental conditions listed in the Technical Specifications chapter.
- The equipment power supply cord shall be connected to a socket-outlet with earthing connection

### Care and Handling

The following tips will help keep your touchscreen display functioning at an optimal level:

- Disconnect the AC power cable before cleaning.
- To clean the display unit cabinet, use a clean cloth lightly dampened with mild detergent.
- It is important that your unit remains dry. Do not get liquids on or inside the unit. If liquid does get inside, turn the unit off and have a qualified service technician check it before you power it on again.
- Do not wipe the screen with a cloth or sponge that could scratch the surface.
- To clean the touchscreen, use a window or glass cleaner applied to a clean cloth or sponge. Never apply the cleaner directly to the touchscreen. Do not use alcohol (methyl, ethyl, or isopropyl), thinner, benzene, or other abrasive cleaners.
- Ensure the environmental temperature and humidity are maintained within specification and do not block ventilation slots.
- Monitors are not designed for outdoors.

### Waste Electrical & Electronic Equipment Directive (WEEE)

This product should not be disposed of with household waste. It should be deposited at a facility that enables recovery and recycling.

## **Section 7: Regulatory Information**

### **Electrical Safety Information**

Compliance is required with respect to the voltage, frequency, and current requirements indicated on the manufacturer's label. Connection to a different power source than those specified herein will likely result in improper operation, damage to the equipment or pose a fire hazard if the limitations are not followed.

There are no operator serviceable parts inside this equipment. There are hazardous voltages generated by this equipment which constitute a safety hazard. Service should be provided only by a qualified service technician.

Contact a qualified electrician or the manufacturer if there are questions about the installation prior to connecting the equipment to mains power.

### **Emissions and Immunity Information**

#### **Notice to Users in the United States:**

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with Part 15C of FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference, including interference that may cause undesired operation of the device.

#### **Notice to Users in Canada:**

This equipment complies with the Class B limits for radio noise emissions from digital apparatus as established by the Radio Interference Regulations of Industrial Canada.

CAN ICES3(B)/NMB3(B)

This device complies with Industry Canada's license-exempt RSSs. Operation is subject to the following two conditions:

1. This device may not cause interference; and
2. This device must accept any interference, including interference that may cause undesired operation of the device.

Notice to Users in the European Union: Use only the provided power cords and interconnecting cabling provided with the equipment. Substitution of provided cords and cabling may compromise electrical safety or CE Mark Certification for emissions or immunity as required by the following standards:

- This Information Technology Equipment (ITE) is required to have a CE Mark on the Manufacturer's label which means that the equipment has been tested to the following Directives and Standards: This equipment has been tested to the requirements for the CE Mark as required by EMC Directive 2014/30/ EU as indicated in European Standard EN 55032 Class B and the Low Voltage Directive 2014/35/EU as indicated in European Standard EN 60950-1.

General Information to all Users: This equipment generates, uses, and can radiate radio frequency energy. If not installed and used according to this manual the equipment may cause interference with radio and television communications. There is, however, no guarantee that interference will not occur in any particular installation due to site-specific factors.

1. In order to meet emission and immunity requirements, the user must observe the following:
  - a. Use only the provided I/O cables to connect this digital device with any computer.
  - b. To ensure compliance, use only the provided manufacturer's approved line cord.
  - c. The user is cautioned that changes or modifications to the equipment not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
2. If this equipment appears to cause interference with radio or television reception, or any other device:
  - a. Verify as an emission source by turning the equipment off and on. If you determine that this equipment is causing the interference, try to correct the interference by using one or more of the following measures:
    - i. Move the digital device away from the affected receiver.
    - ii. Reposition (turn) the digital device with respect to the affected receiver.
    - iii. Reorient the affected receiver's antenna.
    - iv. Plug the digital device into a different AC outlet so the digital device and the receiver are on different branch circuits.
    - v. Disconnect and remove any I/O cables that the digital device does not use. (Unterminated I/O cables are a potential source of high RF emission levels.)
    - vi. Plug the digital device into only a grounded outlet receptacle. Do not use AC adapter plugs. (Removing or cutting the line cord ground may increase RF emission levels and may also present a lethal shock hazard to the user.)

If you need additional help, consult your dealer, manufacturer, or experienced radio or television technician.

## Agency Certifications

The following certifications and marks have been issued or declared for this monitor:

<ul style="list-style-type: none"> <li>• Australia RCM</li> <li>• Canada CUL, IC</li> <li>• China CCC</li> <li>• Europe CE TUV</li> <li>• Japan VCCI</li> <li>• Russia EAC</li> </ul>	<ul style="list-style-type: none"> <li>• Korea KCC</li> <li>• Mexico CoC</li> <li>• Taiwan BSMI</li> <li>• United States FCC, UL</li> <li>• International CB</li> </ul>
---	---

## Explanation of Markings

1. In accordance with the SJ/T11364-2014 requirement, the electronic information products are marked with the

following pollution control logo.

The Environment-Friendly Use Period for this product is 10 years. The product will not leak or mutate under normal operating conditions listed below and the use of this electronic information product will not result in any severe environmental pollution, bodily injury, or damage to any assets.

Operating Temperature: 0 °C -40 °C / Humidity: 20%-80% (noncondensing).

Storage Temperature: -20 °C ~60 °C / Humidity: 10%~95% (non-condensing).

2. It is encouraged and recommended that this product be recycled and reused according to local laws. The product should not be thrown away casually.

## Section 8: Warranty Information

Except as otherwise stated herein, or in an order acknowledgment delivered to Buyer, Seller warrants to Buyer that the Product shall be free of defects in materials and workmanship. The warranty for the touchscreen display and its components is three years. The seller makes no warranty regarding the model life of components.

Seller's suppliers may at any time and from time to time make changes in the components delivered as Products or components.

Buyer shall notify Seller in writing promptly (and in no case later than 30 days after discovery) of the failure of any Product to conform to the warranty set forth above; shall describe in commercially reasonable detail in such notice the symptoms associated with such failure; and shall provide to Seller the opportunity to inspect such Products as installed, if possible. The notice must be received by the Seller during the Warranty Period for such product unless otherwise directed in writing by the Seller.

Within thirty days after submitting a such notice, Buyer shall package the allegedly defective Product in its original shipping carton(s) or a functional equivalent and shall ship to Seller at Buyer's expense and risk. Within a reasonable time after receipt of the allegedly defective Product and verification by Seller that the Product fails to meet the warranty set forth above, Seller shall correct the such failure by, at Seller's options, either (i) modifying or repairing the Product or (ii) replacing the Product. Such modification, repair, or replacement and the return shipment of the Product with minimum insurance to Buyer shall be at Seller's expense. The buyer shall bear the risk of loss or damage in transit and may insure the Product. Buyer shall reimburse Seller for transportation cost

incurred for Product returned but not found by Seller to be defective. Modification or repair, of Products may, at Seller's option, take place either at Seller's facilities or at Buyer's premises. If Seller is unable to modify, repair, or replace a Product to conform to the warranty set forth above, then Seller shall, at Seller's option, either refund to Buyer or credit to Buyer's account the purchase price of the Product less depreciation calculated on a straight-line basis over Seller's stated Warranty Period. These remedies shall be the buyer's exclusive remedies for breach of warranty. Except for the express warranty set forth above, the seller grants no other warranties, express or implied by statute or otherwise, regarding the products, their fitness for any purpose, their quality, their merchantability, their non-infringement, or otherwise. No employee of Seller or any other party is authorized to make any warranty for the goods other than the warranty set forth herein. Seller's liability under the warranty shall be limited to a refund of the purchase price of the product. In no event shall Seller be liable for the cost of procurement or installation of substitute goods by Buyer or for any special, consequential, indirect, or incidental damages.

Buyer assumes the risk and agrees to indemnify Seller against and hold Seller harmless from all liability relating to (i) assessing the suitability for Buyer's intended use of the Products and of any system design or drawing and (ii) determining the compliance of Buyer's use of the Products with applicable laws, regulations, codes, and standards. Buyer retains and accepts full responsibility for all warranty and other claims relating to or arising from Buyer's products, which include or incorporate Products or components manufactured or supplied by Seller. Buyer is solely responsible for any and all representations and warranties regarding the Products made or authorized by Buyer. Buyer will indemnify Seller and hold Seller harmless from any liability, claims, loss, cost, or expenses (including reasonable attorney's fees) attributable to Buyer's products or representations or warranties concerning same.
