## 2.21F01 Advisory Supervisory Control Platform Firmware

A new general release version of the Supervisory controller firmware version 2.21 F0r has been released and is

available for customer upgrade. For more information, visit the Supervisory Control page on the Emerson w e b s i t e : <a href="https://climate.emerson.com/en-us/products/controls-monitoring-systems/facility-controls-electronics/facility-and-system-controls/lumity-supervisorycontrols-platform">https://climate.emerson.com/en-us/products/controls-monitoring-systems/facility-controls-electronics/facility-and-system-controls/lumity-supervisorycontrols-platform</a>

Figure 1 - E3 Controller

#### **IMPORTANT:**

• Reset or power cycle an upgraded E3 approximately10 minutes after the upgrade is complete.

## Who Should Update

Emerson recommends that all customers upgrade their Supervisory controllers and PCs running Connect+ to the latest version to take advantage of the latest fixes and enhancements listed in Table 3.

All customers who use any of the features below are advised to upgrade to Supervisory controller 2.21F01, and customers using any of the features listed in Table 3.

Figure 2 - Site Supervisor Controller

Global Data	Time Schedules
XM Circuit Application	System Logs
Floor plans	CANbus
Smart Alarms	Enhanced Suction
System Backup	Connect+
Online Help	Backup/Restore
BACnet	M400 Device
Offline Programming	

#### **CONNECT+ UPDATE RECOMMENDED**

Supervisory Controller Version	Recommended Connect+ Version
2.21F01	1.5.4F01

# Table 1 – Supervisory Controller and Connect+

Compatibility Matrix

It is recommended to upgrade to the latest Connect+ version. If you plan to upgrade Supervisory controllers and Connect+ at the same time, upgrade Connect+ to the latest version first, then update the Supervisory controllers. Contact Emerson for more information about upgrading.

## **CONTROLLER FIRMWARE COMPATIBILITY**

Firmware	Platform
E3_#.####_ Display_Update	E3 only
E3_#.####_ Firmware_Update	E3 and Site Supervisor
SS_#.####_Firmware_Update	Site Supervisor only

## Table 2 – Firmware Platform Mapping

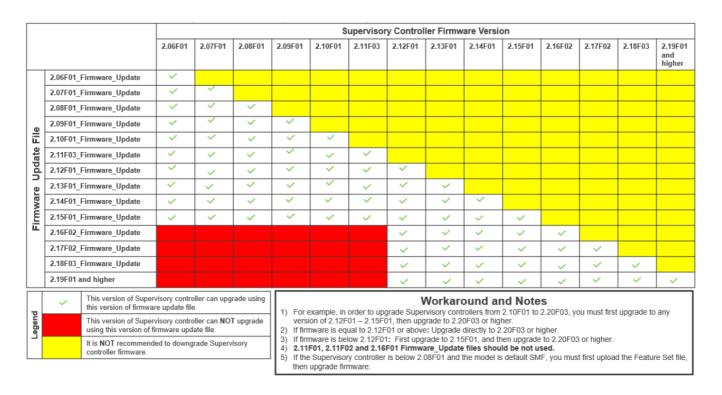

Features and Fix Descriptions	Supported in Supervisory Controllers 2. 21F01
Features	
Smart Alarms > Smart Alarm function is now supported for CO2 and Enhanced Condenser applications.	✓

Calendar Enhancements for Schedules  > Time options added and new Day and Holiday selections added for slave events.  •Master Time – Schedule for the master event.  •Overlap Time – Time of the slave event that is shared with the master schedule.  •Reduced Time – Displayed with the slave event and scheduled to end before the master schedule event (may be based on relative or absolute time).  •Slave Time – Event starts prior to master event and/or ends after master event schedule (based on relative time only).  •Absolute Time – Time displayed in blue occurs before or after the master event start and end times (based on absolute time only).	<b>✓</b>
Password Lockout  > If an incorrect password is entered 10 times in a row, the user will be locked out for 30 minute s. A message will appear to show the number of remaining attempts.	✓
Send To Tile Points  > Source points can be sent to target users. Tile point changes to an application can be sent s electively to other applications of the same type. Tile point displays can be easily created for s pecific applications and users.	✓
XM Circuit  > Case Clean out support added. Enable from the Cleaning Switch parameter in the General ta b of the XM Circuit application. Set the mode from the Cleaning Mode parameter and configur e Failsafe time settings.	<b>✓</b>
Sporlan Kelvin 2 Support added; license required.	✓
Fixes	
Time Schedule > Two events can no longer be added to a slave schedule that conflict with each other (for exa mple, events with the same parameters, with the exception that the first event has no OFF event.) A warning message will appear.	
BACnet > BACnet IP Broadcast is now supported. > The unit number is now visible in the Audit Log and Service Log for the setpoint file.	✓
Online Help  • XM Circuit  > Help text and links are now corrected.  • System Summary Screen  > Supported browsers added.  • XEV22D 1.1  > Help support added.  • M400  > Help support added.  • CoreSense  > Help support added.  • IPX6, IPX15, IPX12  > Property and page level help for additional parameters.  • Onboard IO  > Property and page level help for additional parameters.  • Discus  > Missing help icons are now visible.	✓
Backup File Name Configuration > The Backup file name in the USB/SD card is now consistent with that in the local PC.	✓

M400 Device > The Decel and Accel Rate value in the Setpoints tab now shows correct values for min and max.	$\checkmark$
E3 Global Data Application  > The "Processor Temperature" property has been added on the "Sys Data" tab in E3.  > "Sunrise Time" and "Sunset Time" values are now correct in the Solar Time tab.	✓
UI Enhancement > The controller unit number is now included in the footer in the lower right of the screen.	✓
Offline Programming > Floor plan files exported from Offline Programming are now correct and can be installed.	$\checkmark$
Floor plans > Alarm status no longer displays in "Alarm High Limit" and "Alarm Low Limit" for an E2 unit.	✓
System Logs > The unit number is now visible in the Audit Log and Service Log for the setpoint file.	$\checkmark$
Enhanced Suction > The "None" setting removed for "Dgtl Lower %" and "Dgtl Upper %" properties.	✓
CANbus  > When using the Connect+ function, "Obtain Controller Info" in the IPX device relays will no lo nger intermittently activate.	✓
