EnGenius Started with Facebook Wi-Fi Instructions

1. Download the Cloud To-Go app
2. Create an EnGenius Cloud account.
3. Sign in to your EnGenius Cloud account. a.
4. If needed, tap on the organization and/or network name to register device.
5. Tap Register Device.

6. Locate and scan the QR code on the back of device.
7. Confirm device information and tap Register.

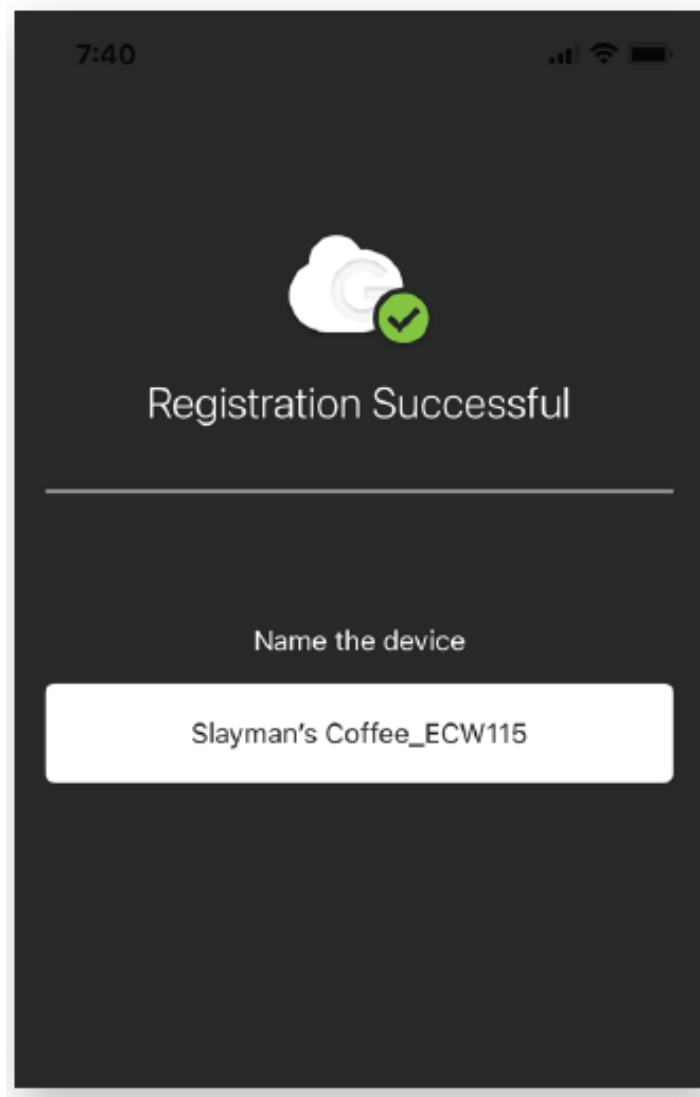

A screenshot of a mobile application screen titled "Device Information". At the top center is a white rounded square icon with a black "G" logo and the word "Google" underneath. Below the icon, the title "Device Information" is displayed in white text. The screen contains a table with four rows of device information. At the bottom, there is a large blue rounded rectangular button labeled "Register" and a smaller, dimmed "Cancel" button below it.

| | |
|-------------|-------------------|
| Type | AP |
| Model | ECW115 |
| MAC Address | 88:DC:96:83:2E:65 |
| Serial No. | 19B0C2W11MH9 |

8. Name your device. NOTE: Some users name their devices after the location of the device (for example, Outdoor Cafe AP, Store Front AP, or Break Room AP). Some users add the model number (for example, Kitchen ECW115). If you don't name your device, the app will use the model number as the default.

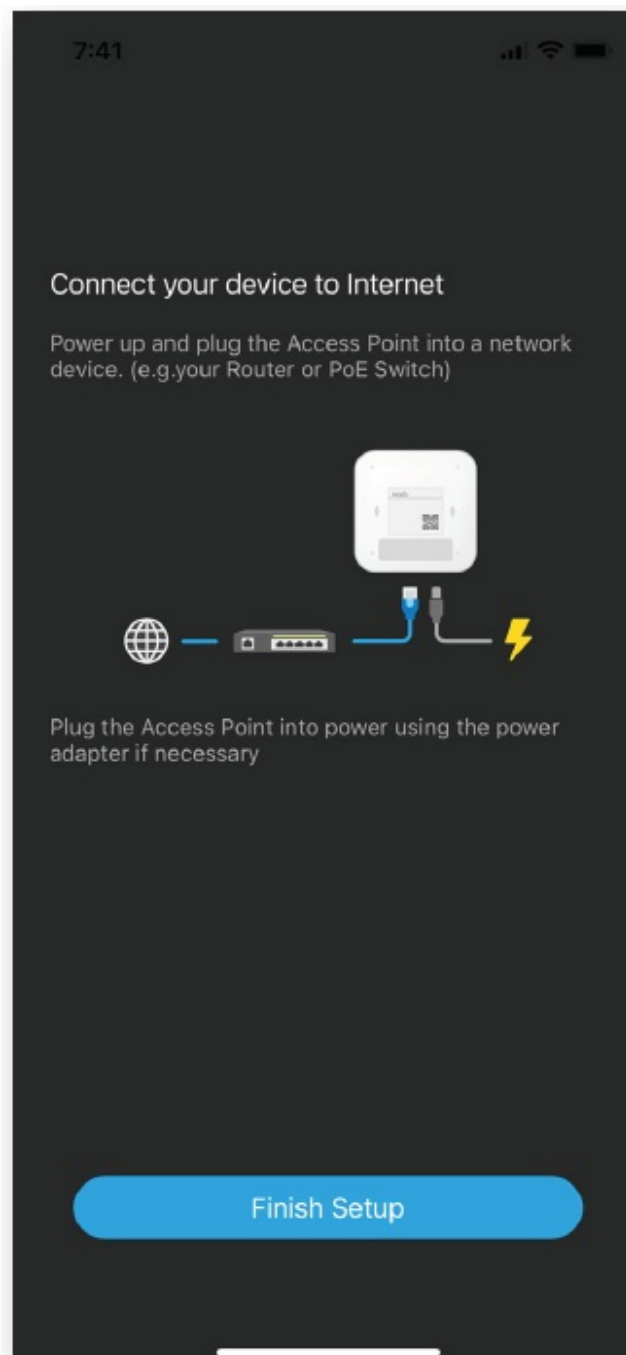

9. Assign the device to your network.

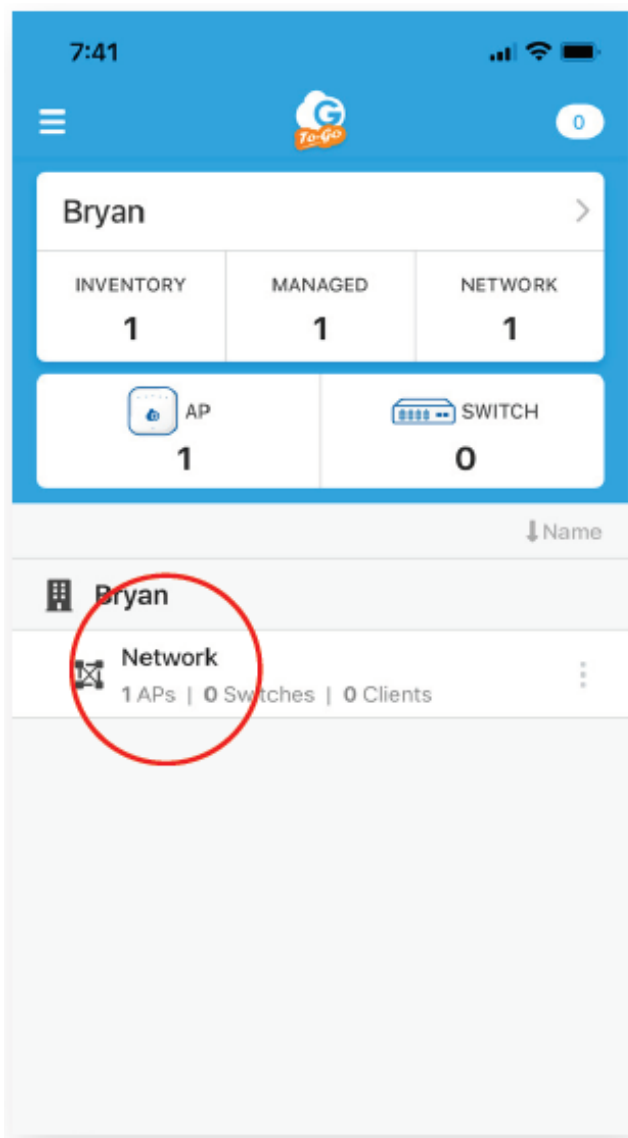

NOTE: If you don't want to assign the device to your network right away, the device will sit unassigned among your list of devices. Until you assign it to your network, you won't be able to use the device.

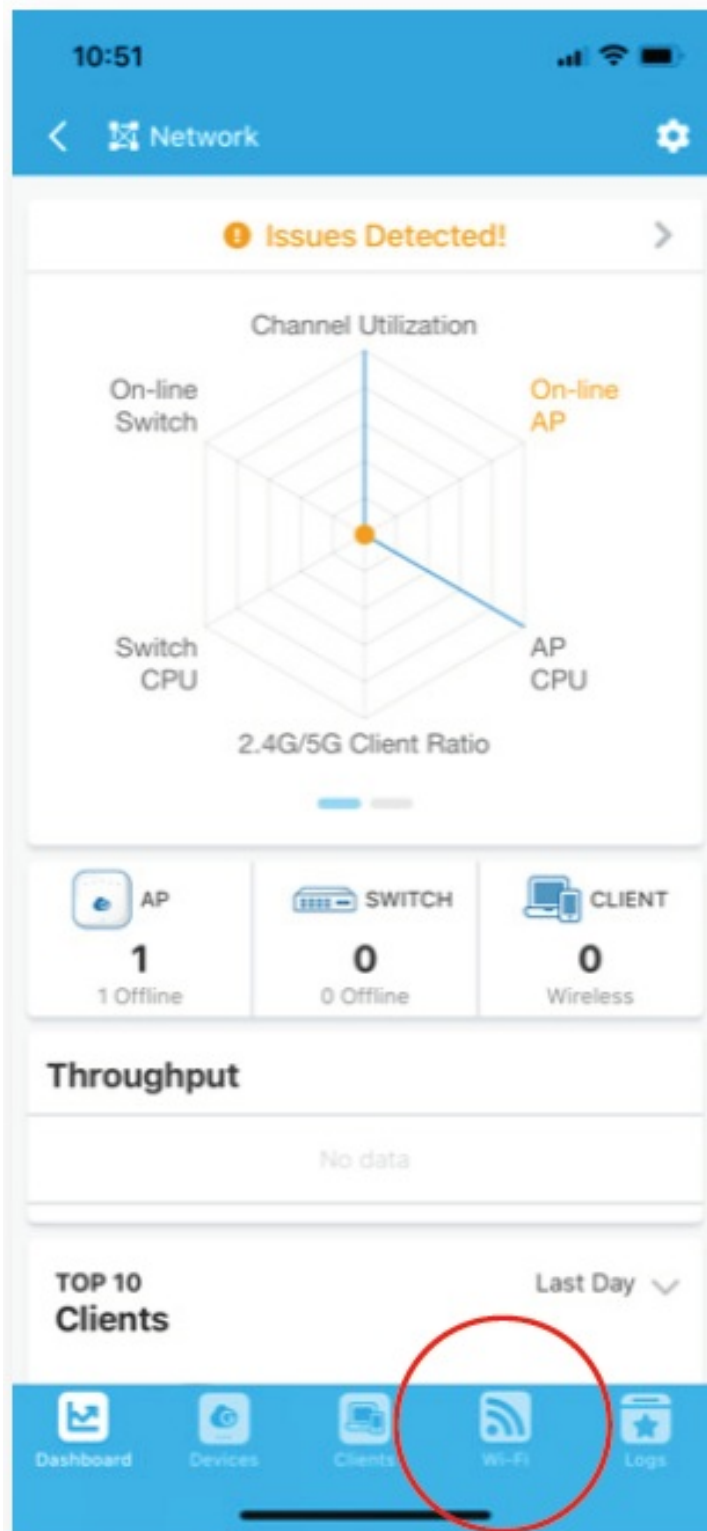

10. Plug in your network device to a port connected to the internet.
11. Tap on Finish Setup.

12. Tap on "Network."

13. Tap on the Wi-Fi icon at the bottom of the screen.

14. Tap on the PLUS (+) symbol to create a new Wi-Fi name (SSID).

15. Enable "Facebook Wi-Fi."
16. Tap Create in the upper right-hand corner.
