Contents

PRECAUTIONS FOR USE AND COMMON PROBLEMS

1. Long press the power button for about 3 seconds, the sound card is turned on or off the power-on indicator light is blue, and the red light is displayed when charging, and will automatically turn off when it is full. Close;

2. When the sound is low or the sound quality is not good, it means that the battery is insufficient. Please charge it. Try not to charge the sound card during a live broadcast. When the current is unstable, it will cause current interference or noise to the sound card.

3. When using, all interfaces need to be fully plugged in. If the phone has a phone case, please remove the phone case, avoid the case against the plug, and turn the plug twice after connecting; if you use a condenser microphone with high sensitivity, the surrounding environment will be noisy. It may be recorded or howling, please adjust the volume of the microphone to reduce the sensitivity;

4. During the live broadcast, the volume of the live mobile phone must be turned off, otherwise, there will be heavy sound, the volume of the accompaniment mobile phone and computer must be turned on and the recording knob of the sound card turned on on on to the right. These are the volume heard by the audience and the recording and volume;

5. For live streaming or recording songs on a single mobile phone, the music volume is adjusted on the mobile phone, and the accompaniment of the music input can be adjusted on the sound card or the accompaniment device: when listening to the live broadcast effect, do not listen to the live broadcast on the mobile phone with the live broadcast mobile phone. When testing the live broadcast effect in the same area,there will be signal interference and whistling sound:

6. When the computer is broadcasting live or recording a song, first unplug the computer speaker. then turn off the power of the speaker. connect the sound card to the computer with the charging cable, first, check whether the driver is installed successfully (there will be a prompt in the lower right corner of the computer) to ensure that the computer recognizes the Sound card: It is not recommended to use speakers for live broadcast (please use monitor ears), because the sound from the speakers will be recorded by the microphone again, resulting in double sound.

7. Each time you broadcast or record a song, you should test whether the sound card and the device are connected. Click the sound effect of the sound card (such as applause and laughter), and the sound can be recorded or the audience can hear the sound, indicating that the sound card has been connected to the device, and you can rest assured of use.

8. The four-section earphone with a microphone is inserted into the earphone hole, and the three-section monitor earphone without a microphone is inserted into the earphone hole of the speaker. and the four-section earphone with microphone is not allowed to be inserted into the earphone speaker hole. which will cause sharp noises. Do not use it with the microphone at the same time. because the headset has its own microphone. which will cause double sound The headset should be adjusted from the minimum volume. LIMU lb iuu rnyn, mere will luwirty.

9. 9 Connect the Bluetooth accompaniment and turn on the Bluetooth of the mobile phone. Search for the device

and find "V8S" and click Connect. After the connection is successful, the Bluetooth indicator light on the display will be high, indicating that the Bluetooth has been connected.

The product battery is a built-in rechargeable lithium battery. Please do not disassemble and replace it by yourself. Use the correct method to charge the sound card. Do not place the sound card near a fire source or expose it to sunlight. The heating of the battery will destroy the safety device and may cause the battery to explode or burn.

This product has been inspected to meet the specified quality standards and is allowed to leave the factory.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
