## Product Usage Instructions

The A series timeswitch and programmer is designed to be simple and user-friendly. Here are the steps to use it:

### Quick Set Up

Connect the timeswitch and programmer to your heating system according to the installation instructions provided in the user manual.

### Programming

The A series allows you to set up to 3 On/Off periods per day for each zone. Follow these steps to program your desired heating schedule:

1. Press the programming button on the timeswitch.
2. Use the intuitive user interface to navigate through the options.
3. Select the desired zone.
4. Set the On and Off times for each period.

## Boost Function

If you need an extra burst of heat, you can activate the boost function. Here's how:

1. Press the boost button on the timeswitch.
2. Select the desired zone.
3. Choose the duration for the boost (e.g., 1 hour).

## Holiday Mode

If you are going away and want to save energy, you can activate the holiday mode. Follow these steps:

1. Press the holiday mode button on the timeswitch.
2. Select the desired zone.
3. Set the start and end dates for the holiday period.

## Service Interval Timer

The A series has a built-in service interval timer to remind you to get your heating system serviced. Here's how to activate it:

1. Press the service interval button on the timeswitch.
2. Follow the prompts to set the desired service interval.

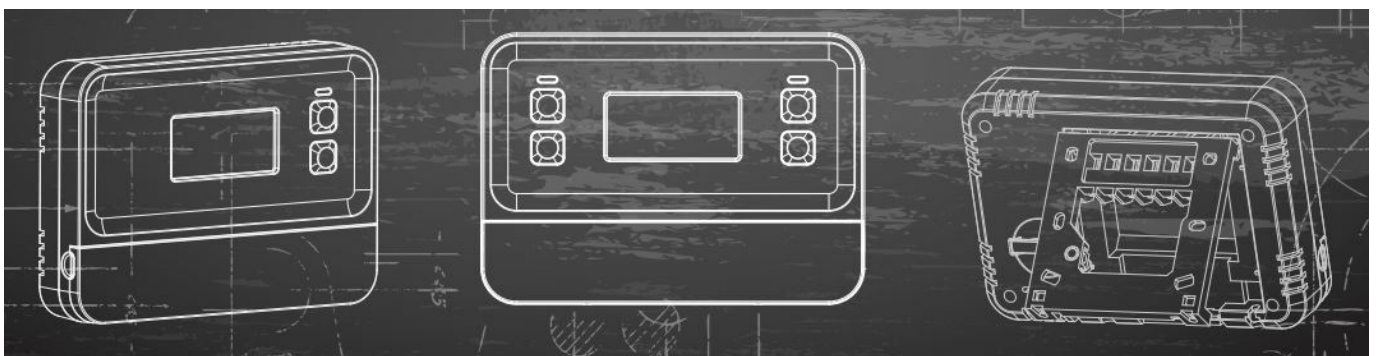

## Contemporary Design

The A series timeswitch and programmer comes with a sleek pure white casing that suits all interiors. It is also designed to fit onto industry standard backplates, making installation easier.

For more information, you can scan the QR code or contact EPH Controls Ireland or EPH Controls UK using the contact details provided.
