EPH CONTROLS COMBIPACK2 Smart Thermostat with Automation and Optimum Start

Product Information

The product is called “CombiPack2” and it is a smart thermostat with automation and optimum start feature. It is designed to be used with combi boilers. The product is compliant with Boiler Plus regulations and ErP IV Class standards. For any sales inquiries, you can contact EPH Controls UK at sales@ephcontrols.co.uk or visit their website at www.ephcontrols.co.uk. The product reference number is AW1164.

Product Usage Instructions

1. Before installing the CombiPack2, make sure to turn off the power to the boiler.
2. Identify the appropriate location for the smart thermostat. It should be placed in a central area of the house for optimal temperature control.
3. Remove the existing thermostat from the wall, if applicable.
4. Connect the wiring of the CombiPack2 according to the provided wiring diagram. Ensure proper insulation of the wires.
5. Mount the CombiPack2 on the wall using the provided screws and wall anchors.
6. Turn on the power to the boiler and follow the on-screen instructions on CombiPack2 to complete the setup.
7. Configure the desired temperature settings and automation preferences using the intuitive menu interface.
8. Utilize the optimum start feature to ensure efficient heating by allowing the CombiPack2 to learn and adapt to your heating patterns.
9. Regularly check and replace batteries, if applicable, to maintain uninterrupted functionality.

Please refer to the full user manual for detailed instructions and troubleshooting steps.

Using Instructions

BOILER PLUS A MAJOR CHANGE TO BUILDING REGULATIONS

If you are installing a gas combi boiler, energy efficient controls must be fitted to give boiler interlock plus time and temperature controls. In addition to this, one of the following must be fitted.

- Flue Gas heat recovery
- Weather compensation
- Load compensation
- Smart thermostat with automation and optimum start

Boiler Plus Compliant
