Adjusting the program settings

- **a)** Lower the cover on the front of the unit.
- **b)** Move the selector switch to the PROG SET position.

- **c)** Press the PLUS or MINS buttons to adjust the P1 ON time. Press OK
- **d)** Press the PLUS or MINS buttons to adjust the P1 OFF time. Press OK
- **e)** Repeat this process to adjust the ON & OFF times for P2 & P3.
- **f)** When this is complete, move the selector switch to the RUN position.

Boost function

This function allows the user to turn ON the timeswitch for a period of 1, 2 or 3 hours. This does not affect your program settings. If the zone that you wish to Boost is timed to be OFF, you have the facility to switch it ON for 1,2 or 3 hours.

- **a)** Press the boost button once, twice or three times respectively.
- **d)** To cancel the boost function, simply press the boost button again.

Operating the thermostat

The thermostat will allow the timeswitch to activate provided the ambient temperature is below the setpoint.

- **a)** Adjusting the temperature setpoint

  Rotate the dial clockwise to increase or counter clockwise to decrease the temperature setpoint.

  You can press in the handwheel to confirm or the temperature will be confirmed automatically after 5 seconds.
- **b)** Boost from the thermostat

  You can activate the timeclock for 1,2 or 3 hours by pressing the boost button on the thermostat 1, 2 or 3 times.

  The thermostat will display +1H, +2H, +3H to represent what is selected.

  To turn off the boost from the thermostat, you must press the boost until '+1H, +2H, +3H ' disappears from the thermostat screen.
