Installation and Operating Guide

1 Zone Timeswitch

Installation Instructions

Contacts: Volt Free Contacts

Program: 5/2D Backlight: On Keypad Lock: Off Frost Protection: Off Operating Mode: Auto Pin Lock: Off Service Interval: Off Zone Title: ZONE

Specifications

Power Supply: 230VAC Ambient Temperature: 0 ... 50°C

Dimensions: 161 x 100 x 31 mm

Contact Rating: 3(1)A
Program Memory 5 Years
Temperature Sensor: NTC 100K
Backlight: White
IP Rating: IP20

Battery: 3VDC Lithium LIR2032 & CR2032

Backplate: British System Standard

Pollution degree: 2 (Resistance to voltage surge 2000V; as per EN60730)

Software Class: Class A

LCD Display

[1] Displays current time.

[2] Displays current day of the week.

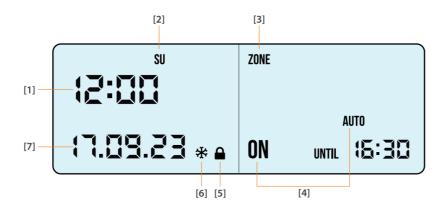

[3] Displays zone title.

[4] Displays current mode.

[5] Displays when keypad is locked.

[6] Displays when frost protection is activated.

[7] Displays current date.

9. Menu Button

Terminal Connections

- N Neutral
- L Live
- 1 COM Common Connection
- 2 OFF N/C Normally Closed Connection
- 4 ON N/O Normally Open Connection

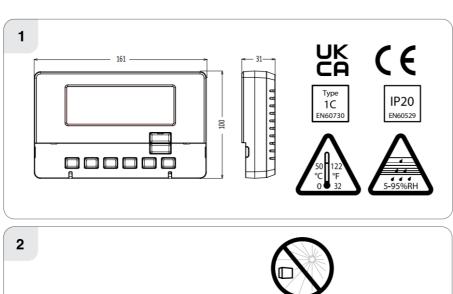

Switching Options

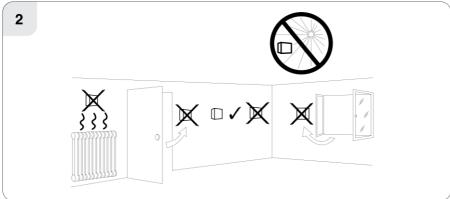

Mains Switching

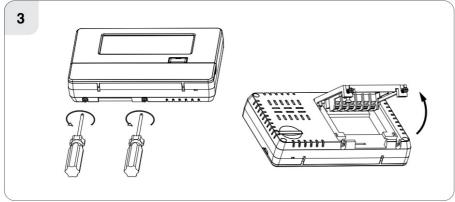

- Link L to 1.

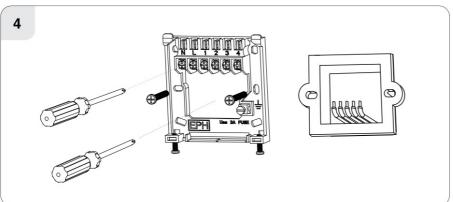

Low Voltage Switching

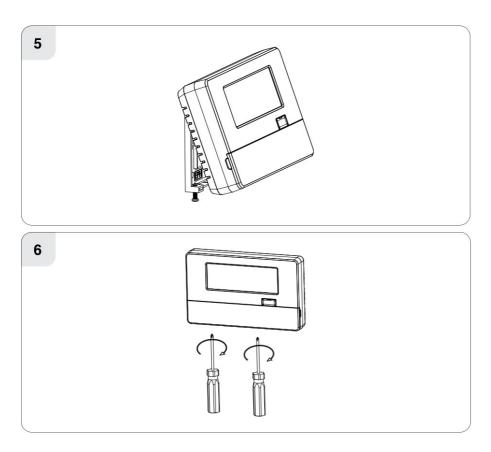

- Remove the external controls link from the boiler PCB.
- Connect 1 and 4 to these terminals.

Caution!

- Installation and connection should only be carried out by a qualified person.
- Only qualified electricians or authorised service staff are permitted to open the timeswitch.
- If the timeswitch is used in a way not specified by the manufacturer, its safety may be impaired.
- Prior to setting the timeswitch, it is necessary to complete all required settings described in this section.
- Before commencing installation, the timeswitch must be first disconnected from the mains.

This timeswitch can be surface mounted or mounted to a recessed conduit box.

- 1) Remove the timeswitch from its packaging.
- 2) Choose a mounting location for the timeswitch:
- Mount the timeswitch 1.5 metres above the floor level.
- Prevent direct exposure to sunlight or other heating / cooling sources.
- 3) Use a philips screwdriver to loosen the screws of the backplate on the bottom of the timeswitch.

The timeswitch is lifted upwards from the bottom and removed from the backplate.

(See Diagram 3 on Page 7)

- 4) Screw the backplate onto a recessed conduit box or directly to the surface.
- 5) Wire the backplate as per the wiring diagram on page 6.
- 6) Sit the timeswitch onto the backplate making sure the timeswitch pins and the backplate contacts are making a sound connection, push the timeswitch flush to the surface and tighten the screws of the backplate from the bottom. (See Diagram 6 on Page 7)

1 Zone Timeswitch

Operating Instructions

Quick introduction to your R17^{V2} Timeswitch:

The R17^{V2} timeswitch has up to three daily heating programs called P1, P2 and P3. See Page 13 for instructions on how to adjust the program settings.

Within these sections you can see what mode the timeswitch is currently in.

When in the AUTO mode, it will show when the timeswitch is next programmed to be switched ON or OFF. For 'Mode Selection' please see page 11 for further explanation.

When the timeswitch is ON, you will see the red LED light up. This indicates that power is being sent from the timeswitch.

There are four modes available for selection.

AUTO The timeswitch operates up to three 'ON/OFF' periods per day (P1,P2,P3).

ALL DAY The timeswitch operates one 'ON/OFF' period per day. This operates from the first 'ON' time to the third 'OFF' time.

ON The timeswitch is permanently ON.OFF The timeswitch is permanently OFF.

Press Select to change between AUTO, ALL DAY, ON & OFF.

The current mode will be shown on the screen.

The Select is found under the front cover.

Programming Modes

This timeswitch has the following programming modes.

5/2 Day mode Programming Monday to Friday as one block and Saturday and Sunday as a 2nd block.

7 Day mode Programming all 7 days individually.24 Hour mode Programming all 7 days as one block.

5/2 Day	V
U/ = Du	,

(b)	P1 ON	P1 OFF	P2 ON	P2 OFF	P3 ON	P3 OFF
Mon-Fri	06:30	08:30	12:00	12:00	16:30	22:30
Sat-Sun	07:30	10:00	12:00	12:00	17:00	23:00

			7 Day			
	P1 ON	P1 OFF	P2 ON	P2 OFF	P3 ON	P3 OFF

Everyday	06:30	08:30	12:00	12:00	16:30	22:30

Adjust the Program Setting in 5/2 Day Mode

Press PROG.	
Programming for Monday to Friday is now selec	ted.
Press + and - to adjust the P1 ON time.	Press OK.
Press + and - to adjust the P1 OFF time.	Press OK.
Repeat this process to adjust P2 and P3 times.	
Programming for Saturday to Sunday is now sel	ected.
Press + and - to adjust the P1 ON time.	Press OK.
Press + and - to adjust the P1 OFF time.	Press OK.
Repeat this process to adjust P2 and P3 times.	

Press MENU to return to normal operation.

While in programming mode, pressing Select will jump to the next day (block of days) without changing the program.

Note:

- 1. To change from 5/2d to 7D or 24H programming, refer to page 16, Menu P01.
- 2. If you don't wish to use one or more of the daily programs then simply set the start time and end time to be identical. For example, if P2 is set to start at 12:00 and end at 12:00 the timeswitch will simply ignore this program and proceed to the next switching time.

Press PROG

Press or the individual day (block of days).

Press Select to jump to the next day (block of days).

Press MENU to return to normal operation.

Boost Function

The timeswitch can be boosted for 30 minutes, 1, 2 or 3 hours while it is in the AUTO, ALL DAY & OFF mode.

Press Boost 1, 2, 3 or 4 times, to apply the desired BOOST period.

When a Boost is pressed there is a 5 second delay before activation where 'BOOST' will flash on the screen, this gives the user the time to select the desired BOOST period.

To cancel a BOOST, press Boost again.

When a BOOST period has ended or has been cancelled, the timeswitch will return to the mode that was previously active prior to the BOOST.

Note: A BOOST cannot be applied while in the ON or Holiday Mode.

When the timeswitch is in the AUTO or ALLDAY mode, the Advance function allows the user to bring it forward to the next switching time.

If the timeswitch is currently timed to be OFF and $\frac{|ADV|}{|ADV|}$ is pressed, it will be switched ON until the end of the next switching time. If the timeswitch is currently timed to be ON and $\frac{|ADV|}{|ADV|}$ is pressed, it will be switched OFF until the start of the next switching time.

Press ADV

The timeswitch will display 'ADVANCE ON' or 'ADVANCE OFF' until the end of the next switching time.

To cancel an ADVANCE, press ADV again.

When an ADVANCE period has ended or has been cancelled, the timeswitch will return to the mode that was previously active prior to the ADVANCE.
