Connection Method

Bluetooth Mode
Turn the “mode switch” to the BT position. If no host has been paired before, the keyboard will automatically enter the code-matching state. (if you have paired the host before, you will directly connect back, The indicator light flashes slowly; if the connection fails for 3 seconds, the keyboard enters the Bluetooth sleep state; If the connection is successful, the indicator light will be on for 3 seconds and then the original state of the button backlight will be restored.)

Multi-device connection: Touch the button to switch to the corresponding Bluetooth device. The light of the corresponding button flashes slowly for 3 seconds to indicate the reconnection. After the reconnection is successful, the corresponding button light is always on to indicate; the reconnection fails and the backlight is off.
Long press for 2 seconds to pair the corresponding device, the corresponding button light flashes quickly to indicate the code pairing, after the code pairing is successful, the corresponding button light is always on to indicate; when the connection fails, the backlight goes out.

USB Wired Connection Mode
Turn the “mode switch” to the USB position to realize the USB wired connection mode and turn off the battery power supply at the same time. (The battery can be charged by connecting the USB in any mode, until the battery is fully charged)

Mac/Win Dual System Function

Windows System : switch the system to the Win gear position, which matches the Windows system and usage habits; the F1-F12 key functions are directly triggered, and the multimedia key functions need to be combined with the (FN) key to achieve.

Mac System **:** Switch the system to the MAC position, and match the MAC system and usage habits at this time; the multimedia keys are directly triggered, and the F1-F12 key functions need to be combined with the (FN) key to achieve. Windows System: switch “win” and “alt” to the left of the space bar to “alt” and ‘win’; the “alt’, “fn” and ctrl” on the right side of the space bar are switched to “ctrl”, “fn” and “alt”.
