You can also use the software to customize the knob functions.

Power switch	OFF power off (wired connection)/ON power on (wireless mode)	OFF power off (wired connection)/ON power on (wireless mode)
Mode switch	Left mac mode/right win mode	Left mac mode/right win mode

Pressing Fn + Del at the same time allows you to switch the RGB effect of

USB-Type-C   Type-c HUB

WIRED OR WIRELESS

Use the connection mode switch on the top of the keyboard. OFF means to turn off the power supply. At this time, inserting the cable can realize Wired connection mode and timely charging. ON means to turn on the power and enter the wireless working mode.

PAIRING BLUETOOTH

FN • 0/WtE Long Press for 3 seconds to pair Bluetooth device
FN • 0/WtE Short Press to switch to last paired device
Turn the keyboard power switch to ON to enable wireless connection mode.
Long press FN+Q/W/E to start pairing. When pairing, the indicator light flashes quickly. After pairing is successful, the indicator light stays on for a long time, followed by the

Main backlight. If pairing fails within 30 seconds, the indicator light goes out and the Keyboard enters the sleep mode.

2.4G PAIRING MODE

Switch to 2.4G wireless connection mode FN+R.
Urn the keyboard power switch to ON, turn on the wireless connection mode, and long Press FN+R to turn on the 2.4G pairing mode. The indicator light will flash quickly, and Insert the receiver to start pairing. After the pairing is successful, the prompt light will Stay on and follow the light effect of the primary key area. If pairing fails within 30 seconds, The indicator light goes out and the keyboard enters the sleep mode.

PAIRING WIRED MODE

urn the keyboard power switch to OFF to enter the wired connection mode, and use a USB-C wire to connect the keyboard to your device.

MODE SWITCHING

If you need to switch the system or change the connection device of the keyboard, please Adjust the top mode switch of the keyboard to the operating system corresponding to the Computer. The left side is Mac mode, and the right side is Win mode. Otherwise, some shortcut Keys may not work properly.

KEYYBOA RD WAKE UP/SLEEP

After the keyboard enters the sleep mode, press any key to wake the keyboard. If you are in Bluetooth/2.4G mode, the keyboard will automatically connect to a Bluetooth/2.4g device.
Options

HOT PLUG SMART SCREEN: 1.33inches
