## Scan A Document

**Note:** To scan using the  start button, you must connect the scanner to a computer with Document Capture Pro (Windows®) or Document Capture (Mac) installed.

1

Load the document facedown, short edge first.

2

3

Press the  start button.

Document Capture Pro (Windows) or Document Capture (Mac) starts automatically and your document is scanned.

**Note:** For detailed information on loading and scanning originals, see the online User's Guide.

### Scan From A Mobile Device (DS-575W II)

To scan from an iOS or Android™ device, download and install the free Epson Smart Panel app from the App Store or Google Play™.

### Scan From A Computer

You can also scan from your computer with Document Capture Pro (Windows) or Document Capture (Mac).

**Windows 10:** Click  > **Epson Software** > **Document Capture Pro**.

**Windows 8.x:** Navigate to the **Apps** screen and select **Document Capture Pro**.

**Windows 7:** Click  > **All Programs** > **Epson Software** > **Document Capture Pro**.

**Mac:** Select **Applications** > **Epson Software** > **Document Capture**.

For more information about scanning from a computer and creating custom scan jobs with Document Capture Pro (Windows) or Document Capture (Mac), click the Help or ? button in the scanner software or see the online *User's Guide*.

### Troubleshooting Wi-Fi Setup(DS-575W II)

- Your network name (SSID) and password are case sensitive. Make sure you enter uppercase and lowercase letters correctly.

- If the scanner did not connect automatically and you are connecting it to the network manually, make sure you select the same network that the computer is connected to.
- The scanner can only connect to a network that supports 2.4 GHz connections. If your router offers both 2.4 GHz and 5 GHz connections, make sure the 2.4 GHz band is enabled and you are connecting to it.

- If your computer is connected to the 5 GHz band, connect it to the 2.4 GHz band for scanner setup. This will allow the scanner to automatically connect to the network when you repeat the software installation process.
- Turn your router off and on again, then repeat the software installation process.
