Safety

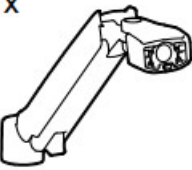

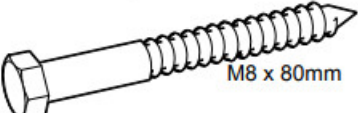

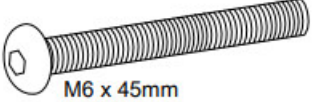

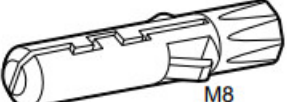

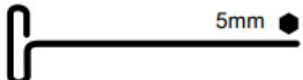

WARNING: Ensure that the wall structure is capable of supporting four times the total weight of mounted equipment. Mounting to wall surfaces that do not meet this criterion may result in an unstable, unsafe condition which could lead to personal injury and/or property damage. Consult a construction professional if you have any doubt about what this means in regard to your particular application.

NOTE: Product movements and spring adjustments may not work until mounted and all equipment has been attached.

Optional locking feature (customer-supplied lock)

	A	B	C	D	E
1	1x 	1x 	2x 	1x 	1x 
2			2x 	1x 	1x 
3		1x 	1x 		1x 
4	2x  M8 x 80mm		2x  M6 x 45mm		4x 
5	2x  M8		4x  10-24 x 1/2"	2x  M6	2x  Screw
6	1x  4mm		1x  1/8"	2x  M4 x 14mm	4x  M4 x 8mm
7	1x  5mm			2x 	

Tools Needed

Mounting Height for Ergonomic Workstation

This mounting height is a recommendation for an ergonomic workstation that accommodates user heights of 5'0"-5'9" (152-175cm). If user heights are different than this, you should change the mounting height to accommodate user heights. (Change the mounting height by one inch for every one-inch difference in user heights).

Determine mounting location:

Front view with arm pushed back against the wall.

Top view showing a range of motion when pulled out from the wall.

CAUTION: Make sure the wall mount bracket is level, flush, and snug to the wall surface.
DO NOT OVERTIGHTEN THE BOLTS.

WOOD STUD MOUNTING

CONCRETE

ERGOTRON PRODUCT

WOOD STUD MOUNTING

CONCRETE

WARNING: Mounting holes must be at least 3-1/8" (80mm) deep and must be located within solid concrete, not mortar or covering material.

If you drill into an area of concrete that is not solid, reposition mounting holes until both anchors can be fully

inserted into solid concrete!

WARNING: Anchors that are not fully set in solid concrete will not support the applied load resulting in an unstable, unsafe condition that could lead to personal injury and/or property damage. Consult a construction professional if you have any doubt about what this means in regard to your particular situation.

ERGOTRON PRODUCT; Wall Track and Brackets sold separately.

NOTE: when sliding the sleeve on to bracket, align the slot over the rotation stop.

Adjustment Step

Important! You will need to adjust this product after installation is complete. Make sure all your equipment is properly installed on the product before attempting adjustments. This product should move smoothly and easily through the full range of motion and stay where you set it. If movements are too easy or difficult or if the product does not stay in desired positions, follow the adjustment instructions to create smooth and easy movements. Depending on your product and the adjustment, it may take many turns to notice a difference. Any time equipment is added or removed from this product, resulting in a change in the weight of the mounted load, you should repeat these adjustment steps to ensure safe and optimum operation.

Adjustment Step

CAUTION: DO NOT overtighten fasteners. Overtightening may cause damage to your equipment.

Lift – Up and down

<p>+ </p> <p>Increase Lift Strength If the mounted weight is too heavy or this product does not stay up when raised, then you'll need to increase Lift Strength:</p>	<p>— </p> <p>Decrease Lift Strength If the mounted weight is too light or this product does not stay down when lowered, then you'll need to decrease Lift Strength:</p>

How to remove this tilting feature:

Yup, that's it. Really.
Now your LX Arm is ready for however you work best.

Learn more about ergonomic computer use at: www.ergotron.com/ergonomics

WARNING! Stored Energy Hazard: The arm mechanism is under tension and will move up rapidly, on its own, as soon as the attached equipment is removed. For this reason, DO NOT remove equipment unless the arm has been moved to the highest position! Failure to follow this instruction may result in serious personal injury and/or equipment damage!

Warning: Because mounting surface materials can vary widely, it is imperative that you make sure the mounting surface is strong enough to handle mounted products and equipment.

Caution: Leave enough slack in the cable to allow a full range of motion. To avoid the potential to pinch cables it is important to follow the cable routing instructions in this manual. Failure to follow these instructions may result in equipment damage or personal injury.

CAUTION: DO NOT EXCEED THE MAXIMUM LISTED WEIGHT CAPACITY. SERIOUS INJURY OR PROPERTY DAMAGE MAY OCCUR!
