## PROGRAMMABLE ROOM THERMOSTAT

### What is a Programmable Room Thermostat?

A Programmable Room Thermostat combines a timer and thermostat in one unit by allowing you to set your desired comfort temperature at different times during the day. The ESRT P6C can operate as a 7 day, 5/2 day or 24-hour Programmable Room Thermostat with either 4 or 6 time and temperature events per day. The ESRT P6C also includes energy saving Optimum Start technology as well as the safety feature of Landlord Service. These options can be turned on or off depending on user preference.

## PLUG FIT MOTORISED ZONE VALVE

### What is a Zone Valve?

Motorised Zone Valves are used in wet central heating systems to control the flow of heated water from the boiler to primary circuits such as radiators.

Plug Fit Motorised Zone Valves mean there is no wiring necessary – simply plug them into your PCB Wiring Centre

## ANNUAL MAINTENANCE

An annual service should be carried out in order to ensure safe working and optimum performance and maintain the guarantee.

**YOUR GUARANTEE MAY BE VOID WITHOUT PROOF OF ANNUAL SERVICING.**
