11. Select the feeding time and days then setting the food portions(1-20) for each meal

12. Click the “” Icon in the upper right corner to enter the device settings, choose “Share device” to share it to your friend or family.

## Troubleshooting

### problem solution

Q: Cannot be configured

A: WiFi name and password do not use Chinese, no more than 12 digits, please use a combination of numbers and letters, 5GWiFi signal is not supported, please use 2.4GWiFi signal.

Some software conflicts in the phone also cause the connection to fail. please restart the phone, close the non-system software started with the phone, turn on the phone's Bluetooth and location, and try to reconnect.

Q:The feeder is inaccurate or unable to feed

A: Please check whether there is too much food in the food pan and whether the food passage is blocked, and clean the food outlet and food passage. When using battery power, please check whether the battery is dead or leaking

Q: The feeder is offline

A: Please check the distance between the feeder and the router at home, not more than 10 meters, and try not to divide the wall in between. According to the WiFi characteristics, the WiFi signal of the partition wall will drop sharply, causing the connection to be unstable and offline.

Q: No response after boot

A: First check whether the power is plugged in and whether the switch is turned on.

If they are all plugged in, please check whether the power adapter and power cord are damaged, and contact customer service.
