### Touchpad Functions

Note: Please upgrade iPad to the latest iOS system (13.4.1 and above is the best)

Trackpad Gestures	iOS System
	Single Click – Press the trackpad with one finger until you feel a click
	Click and Hold – Press and hold the trackpad with one finger
	Drag – Click and hold an item then slide the finger across the trackpad to move it
	Wake iPad – Click the trackpad or press any key on your external keyboard
	Dock – Swipe the pointer past the screen bottom with one finger to access the dock
	Home Screen- You can swipe down with single finger to the bottom to pull up your dock or you can click the home indicator (the horizontal line) at the bottom of the screen on Face ID-equipped iPad models to launch the home screen
	Slide Over- You can slide right with one finger to show it and slide it back right again to hide it
	Scroll Up or Down – Swipe up or down with two fingers
	Scroll Left or Right – Swipe left or right with two fingers
	Zoom – Place two fingers near each other on the trackpad, then spread them apart to zoom in or bring them closer together to zoom out
	Go Home – Swiping up with three fingers
	Today View – Get to the first Home screen, then swipe right with two fingers
	Search – Swipe down with two fingers on any Home screen
	Secondary Click -Tap with two fingers to show the contextual menu for Home screen icons, email messages, the Camera button in Control Center and other items, or you can press the control key on your external keyboard.

	Control Center – Move the pointer with one finger to highlight the iOS status icons in the top-right corner of the display, then click the trackpad or swipe up with one finger
	Notification Center – Move the pointer with one finger past the top of the screen near the middle. Alternatively, highlight the iOS status icons in the top-left corner of the display, then click the trackpad or swipe up with one finger
	Screenshot- Tap and hold with four fingers
	App Switcher – Swipe up with three fingers, then pause before lifting them. As an alternative method, place four fingers near each other on the trackpad then bring them closer together, pausing before you lift the fingers

## Charging

1. The keyboard charging port is TYPE-C charging port, the input of the voltage can not exceed DC-5V the keyboard will be broken if the voltage exceed the limit.
2. Connect the TYPE-C plug of the charging cable to the keyboard charging socket the other side is connected to the charger of the tablet PC or the charging interface of the tablet PC charges the keyboard.
3. Please charge it for at least 3 hours before using for the first time and then charging at least 2 hours when it is low battery in the future.
4. The green indicator light flashes: low battery, please charge it on time.
5. When charging, please check whether the charging port is powered normally.

Note: Please do not charge the keyboard for a long time. Keeping it plugged in for a long time will deplete the keyboard's battery life

### FAQ

#### **The LED indicator did not light up when the keyboard was turned on.**

The keyboard battery is empty. Charge it according to the instructions in the “Charging” section.

#### **The tablet did not find the keyboard.**

Make sure you have pressed the “Connect” button. You should see a flashing blue LED. If the LED indicator is not flashing, the keyboard will not be visible to your device.

#### **Pairing failed. The keyboard is in the list of searched available wireless devices.**

Turn off the keyboard and delete it from the search list on your tablet. Then start the search again and perform a new pairing.

**The keys do not work after pairing.**

Check the input setting of the tablet. Make sure that all the settings are ON. If not, change the setting.

**If the pairing between the keyboard and tablet PC is failed or wrong character and typing delayed.**

Delete all the Bluetooth device on the tablet PC -Switch off the Bluetooth function on the tablet PC -Reboot the tablet PC; then switch on Bluetooth function on your tablet PC and pair again.
