**Safety Information**

**IMPORTANT:** Please read and comply with all of the instructions and warnings provided in this manual before using the product. Failure to comply with the instructions and warnings provided herein may result in inaccurate results and/or damage to the product itself.

- The glass platform is slippery when wet. Make sure the platform is dry before stepping on for measurement.
- Consult your primary care doctor or physician before making changes to your diet, exercise plans, and/or physical activities.
- This scale is not intended for commercial use.
- To weigh safely and accurately, please stand still on the center of the platform until a result is calculated.
- **DO NOT** strike or drop the scale.
- **DO NOT** stand on the edge of the scale or jump on it.
- **DO NOT** stand on the scale platform for a prolonged period of time or when not in weighing operation.
- Always place the scale on a hard, dry, and flat surface before measurement.
- Handle the scale with care, as it is a precision instrument.
- Clean the scale with a damp cloth and avoid getting water or any other liquid inside the scale.
- **DO NOT** use chemical or abrasive cleaning agents to clean the scale.
- Keep the scale in a cool environment with dry air.
- Always keep the scale in a horizontal position; do not store vertically.
- If the scale fails to turn on, check whether the batteries are installed correctly. Replace the batteries if necessary.
- If an error appears on the display or if the scale does not turn off automatically, remove the batteries for 3 seconds, then reinstall them.

**Main Functions**

1. Weighing Platform  
2. LCD Display  
3. Unit Selection  
4. Battery Compartment  
5. Anti-skid Padding
Set-Up

Open the battery compartment cover located on the back of the scale. Remove the three 1.5V AAA batteries from their plastic film and apply the batteries under the correct polarity. Re-seal the battery compartment in order to activate the scale.

Operation

Weight Measurement

1. For best results, place the scale on a hard, flat surface. Avoid carpet or soft surfaces.
2. Gently step on the scale. The scale will automatically activate.
3. Remain standing evenly on the scale, without moving or shifting your feet or body. The scale will then display and flash your final results.

Converting Weight Units

Your new digital body weight scale can convert weight measurements with just the press of a button.

1. Apply pressure onto the weighing platform to activate the scale.
2. Press the unit conversion button on the back of the scale to convert units from pounds (lb) to kilograms (kg).
3. Place the scale back onto a hard, flat surface when you are ready to measure.

**NOTE:** For accuracy, the digital scale may trigger automatic calibration when physically lifted and moved or when the unit of measurement is changed. Should a ‘C’ appear on the digital display at any time, recalibrate the scale as noted in the Recalibrating the Scale section.

**Body Measuring Tape**
Your new bodyweight scale comes with a body measuring tape so that you can measure your waist, arms, and legs to help track your fitness progress.

1. Pull the peg to extend the measuring tape to the
2. Wrap the measuring tape around the body part you are measuring.
3. Insert the peg into the slot on the other side of the measuring tape.
4. Press the button on the housing to shorten the measuring tape.
5. When you have finished measuring, remove the peg from the slot and press the button to fully retract the measuring tape.

**NOTE:**
- **WARNING: DO NOT** let children play with the measuring tape.
- Please note that the measuring tape itself starts at the 2-inch mark to compensate for the length of the side of the housing that gets included in the measurement loop.

**Maintenance**

**Battery Replacement**
1. Open the battery compartment on the back of the scale.
2. Remove the old batteries and dispose of them properly.
3. Install three new AAA 1.5V batteries, making sure they are placed under the correct polarity.
4. Replace the battery compartment cover.
NOTE: The scale may need to be recalibrated after replacing the batteries.

Recalibrating the Scale
If the scale has been moved or flipped upside down, it must be recalibrated to ensure accurate results.

1. Place the scale on a hard, flat surface.
2. Step on the scale with one foot until the display lights up, then step off.
3. The scale will show "0.0," indicating that the calibration was successful.
