ABOUT PROFILES

Your Evil Controller comes with 20 customizable profiles. They operate just like classes in Call of Duty@
Simply select the profile (class) and assign mods (perks).
By default, the first 10 profiles have a fire rate equal to that of their profile number. For example,
profile 5 = 5 shots per second. Learn how to modify these defaults under ADJUSTABLE RAPID FIRE.

UPON PROFILE ACTIVATION, PROFILE 1 WILL AUTOMATICALLY BE SELECTED.

SELECT/CLEAR PROFILE

SELECT A PROFILE
Tap X (profile#) of times to choose the desired profile. For example, tapping X 5 times= profile 5.

CLEAR ALL

Clear all functions in the current profile.

Hold for 2 seconds.

PROGRAMMING MODS

RAPID-FIRE
Increase the rate of fire of semi-automatics weapons.

See Advanced Mods for adjusting your rate of fire.

LEFT TRIGGER RAPID FIRE

AKIMBO RAPID FIRE

ADVANCED MODS

ADJUSTABLE RAPID FIRE

Hold for 2 seconds.

Increase rate of fire.

Decrease rate of fire.

TAP to increase by one step. HOLD to increase continuously.

Lock rate of fire.
Each profile has its own adjustable rate of fire

It's possible for the rate of fire to be so fast that it doesn't register in-game. Slowing automatic weapons down to reduce recoil and increase accuracy can be effective. Features 15,000 speed increments.

EVIL RAPID FIRE INCREMENTS

TOO FAST
Weapon stutters/won't fire

PERFECT
Ideal fire rate for selected weapon

TOO SLOW
Weapon fires too slowly

PROFILE FEATURES

CHECK PROFILE
Check current profile number. Pulse/Rumble indicates profile.
For example, 5 pulses/rumbles = profile 5.

TOGGLE PROFILES ON/OFF

Quickly return the controller to stock functionality.

LOCK
Prevent mods from being turned on/off during gameplay. Hold for 3 seconds. When LED pulses, release.

MASTER RESET
Restore the controller to factory settings. Do not perform this operation unless you want to overwrite all of your customized profiles.
This action cannot be undone.
Note: Mods must be toggled off in order to perform Master Reset.

Hold for 10 seconds
