ABOUT PROFILES

Your Evil Controller comes with 20 customizable profiles. They operate just like classes in Call of Duty® Simply select the profile (class) and assign mods (perks).
By default, the first 10 profiles have a fire rate equal to that of their profile number. For example, profile 5 = 5 shots per second. Learn how to modify these defaults under **ADJUSTABLE RAPID FIRE**.
UPON PROFILE ACTIVATION, PROFILE 1 WILL AUTOMATICALLY BE SELECTED.

SELECT/CLEAR PROFILE

SELECT A PROFILE
Tap X (profile #) of times to choose the desired profile. For example, tapping X 5 times = profile 5.

CLEAR ALL
Forgot what mods are on? Clear all in the current profile.

ADVANCED MODS

ADJUSTING RATE OF FIRE

It's possible for the rate of fire to be so fast that it doesn't register in-game. Slowing automatic weapons down to reduce recoil and increase accuracy can be effective. Features 15,000 speed increments.

= Increase rate of fire.

= Decrease rate of fire.

TAP to increase by one step. HOLD to increase continuously.

= Lock rate of fire.

EVIL RAPID FIRE INCREMENTS

(+)

TOO FAST
Weapon stutters/won't fire

GOAL

PERFECT
Ideal fire rate for selected weapon

(I)

TOO SLOW
Weapon fires too slowly

FAST RELOAD

Call of Duty: Ghosts
Call of Duty: Modern Warfare

Functions like the Sleight of Hand perk but does not animate in a similar manner. Because weapons reload at different rates, Fast Reload must be programmed and adjusted accordingly.

HOLD   +   X   TAP

1. Equip your gun of choice.
2. Fire off a few rounds. 0 Press and hold the d-pad down and X to reload.
3. Release the d-pad down and X when the bullet counter shows a full magazine.
4. Fire off a few more rounds. ® Test the reload by tapping X.
5. Hold RT after tapping X and your gun will immediately fire once the Fast Reload is complete. The animation may appear "glitchy", but that's just the mod cutting away the unnecessary animation.

Note. Holding d-pad down and X will restart the programming process.

JITTERMOD (AUTO BURST)

Call of Duty: MWR Only (M16A4)
Enter a profile then,

Activating jitter will disable Rapid fire. Repeat function to disable jitter and reactivate Rapid Fire.
