Connecting with Multi-devices (the 2nd and 3rd one)

When connecting the first device,press Fn+ [A ①] once, then press Fn+ Tab for 3 seconds until the LED lights turn blue and blink.
Then find the device named "BTS.1 Keyboard-1503" and click it to connect.

When connecting the second device, press Fn+ [D ③] once, then press Fn+ Tab for 3 seconds until the LED lights turn blue and blink.
Then find the device named UBTS.1 Keyboard-1503″ and click it to connect.

When connecting the third device, press Fn+ [D] once, then press Fn+ Tab for 3 seconds until the LED lights turn blue and blink. Then find the device named BTS.1 Keyboard-1503″ and click it to connect.

Connecting through USB Cable

(Recommended for desk PCs, for other devices such as smartphones or tablets, it's recommended to connect through Bluetooth according to step 4. and 5.) Connect the keyboard to your PC with the USB data cable that comes with the package, and press Fn+ [F] to select the USB channel, and the device can be connected and used. Notice: If you had connected this keyboard to your device through a USB cable and powered it off and took off the USB cable, please note that in this situation if you want to submit the Bluetooth signal, remember to change the signal channel from USB cable channel to Bluetooth channel, that means you need to press FN+A (or FN+S / F+Dl before you press FN+ TAB for 3 seconds until it starts to blink in blue colour and then start connecting. If you didn't select the channel by pressing FN+A (FN+S or FN+D) before you press FN+ TAB to submit the Bluetooth signal, the keyboard will automatically switch to LOCK mode and the indicator will not light up or blink to respond. In this situation, if you want to connect the Bluetooth, you need to restart the power of the keyboard and follow the
correct sequence, which is selecting the channel first and then submitting the
Bluetooth signal by pressing FN+ TAB, then the keyboard will work
normally.

Switch the channel when connecting with multiple

(at most 3 Bluetooth devices and 1 USB device). When connecting multiple devices at the same time,
press Fn+ [A] [S] [D] [F] switch between the connected devices freely.
