Product Usage Instructions

Pairing Plugs
To pair the smart plugs, follow these steps:

1. Ensure your Alexa Echo device is turned on and connected to the Internet.
2. Using voice commands, ask Alexa to pair the smart plugs.

Please refer to the following video for more information:

Controlling Smart Plugs
To control your smart plugs, use the Amazon Alexa App. This allows you to:

- Remotely control the plugs
- Create groups for simultaneous control
- Schedule timers and set timing for the plugs
- Change the names of the plugs

Setting Timers
You can set timers for your smart plugs using either voice commands or the Alexa app.

Voice Command Settings:

1. Use Alexa Echo to set a timer by giving voice commands. For example, say "Alexa, turn on the first plug at 4:15 pm."

Please refer to the following video for more information:

App Settings:

1. Open the Alexa app and navigate to the smart plug settings.
2. Set the timer according to your preferences.

Please refer to the following video for more information:

Troubleshooting

If your smart plug is not working, try the following steps:

1. Ensure your Alexa Echo device is online and functioning properly.
2. Check if the smart plug is turned on/off correctly using the physical key.
3. Repower the plug within 10 feet of the Alexa Echo device and see if it starts working again.
4. If the previous step fails, reset the plug by pressing the button for 5 seconds until the LED flashes. Then, perform voice pairing again.

Frequently Asked Questions (FAQ)

Can it work without Alexa Echo?
No, Alexa Echo is required for this smart plug to work. Compatible devices include Echo 2nd-4th Gen, Echo Dot 2nd-5th Gen, Echo Plus 1st-2nd Gen, Echo Show, and Echo Studio.

How to pair plugs?

Plugs can be paired with Alexa Echo using voice commands. No app is required. Please refer to the provided video for more information.

What app can be used to control smart plugs?
The Amazon Alexa App can be used to control the smart plugs. It allows for remote control, group control, scheduling, timing, and name changes.

How to set a timer?
Timers can be set either through voice commands using Alexa Echo or through the Alexa app. Please refer to the provided videos for step-by-step instructions.

What can I do if the smart plug doesn't work?
If the smart plug doesn't work, try the following steps:

1. Make sure your Alexa Echo device is online and functioning correctly.
2. Ensure the smart plug is turned on/off correctly using the physical key.
3. Repower the plug within 10 feet of the Alexa Echo device.
4. If the issue persists, reset the plug by pressing the button for 5 seconds until the LED flashes. Then, perform voice pairing again.

How does it work under a 5G wifi network?
The smart plug works under a 5G network via Alexa Echo.

What is its signal range?
The signal range can reach up to 100 feet in an open environment. However, obstacles like walls or doors may reduce the distance. The signal range can be expanded through BLE mesh.

How to reset it?
To reset the smart plug, press the button for 5 seconds until the LED light flashes blue, indicating it has entered pairing mode.

How many plugs can one Alexa Echo support?
One Alexa Echo can support up to 10 smart plugs.

Can smart plugs support Homekit, Google Home, Smartlife, and Smarthings?
No, smart plugs only work with Alexa and are not compatible with Homekit, Google Home, Smartlife, or Smarthings.

Can it work with only the Alexa App without an Alexa Echo device?
No, an Alexa Echo device is required as a hub for the smart plug to work. The Alexa App alone cannot control the plug.

Is this a WiFi smart plug?

No, it is a Bluetooth Low-Energy Mesh (BLE Mesh) smart plug.
