Exioly Smart Home Application

Specifications

- **LED indicator:** Blue
- **Voice control:** Alexa Echo
- **Control options:** On/off, group control, scheduling, timers, renaming
- **Compatibility:** Amazon Alexa app

Product Usage Instructions

Step 1: Pairing Mode

To set up your Exioty Smart Home device, follow these steps:

1. Press and hold the button for 5 seconds until the LED light flashes blue. This indicates that the device is in pairing mode.

Step 2: Discover Device

Next, you need to connect your device to Alexa Echo. To do this:

1. Say to Alexa Echo: "Alexa, discover device."

Step 3: Device Discovery

Wait for approximately a minute for Alexa Echo to discover the Smart Plug. Once discovered, Echo will provide a voice notification saying: "Found the Plug."

Step 4: Control and Configuration

After successful pairing, you can control various aspects of the Smart Plug using voice commands or the Amazon Alexa app. Here are some of the available options:

- **On/Off Control:** Use voice commands or the app to turn the device on or off.
- **Group Control:** Group multiple Smart Plugs together for simultaneous control.
- **Scheduling:** Set specific schedules for the Smart Plug to turn on or off automatically.
- **Timers:** Configure timers to control the duration of device operation.
- **Renaming:** Customize the name of the Smart Plug for easier identification.

If pairing fails, you can start the pairing process again by following Step 1.

Quick Start Guide

• Step 1:

Press and hold the button for 5 seconds until the LED light flashes blue to enter pairing mode.

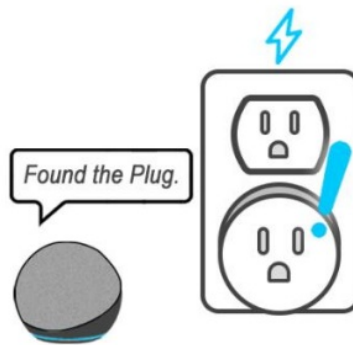

• Step 2:

Say to Alexa Echo: "Alexa, discover the device."

- **Step 3:**

In over a minute, Alexa Echo will discover the Smart Plug. Echo will give you a voice notification, saying: "Found the Plug".

- **Step 4:**

You can control on/off, group control, scheduling, timers, renaming, and more via voice commands or the "Amazon Alexa" app.

Tips: If pairing fails, start pairing again from step 1.

FAQS

What should I do if the pairing process fails?

If the pairing process fails, start the pairing again from Step 1.

What is Exioty Smart Home Application?

The Exioty Smart Home Application is a platform designed to control and manage various smart home devices from a centralized interface. It allows users to monitor and control connected devices such as lights, thermostats, security cameras, and more.

What devices are compatible with the Exioty Smart Home Application?

Exioty Smart Home Application is compatible with a wide range of smart home devices. Check the official website or documentation for a list of supported devices, which may include smart lights, thermostats, locks, cameras, and sensors.

How do I set up the Exioty Smart Home Application?

The setup process typically involves downloading the application from the respective app store, creating an account, and then following on-screen instructions to connect and configure your smart home devices.

Can I control my smart home remotely with Exioty Smart Home Application?

Yes, the Exioty Smart Home Application usually allows remote access. Ensure that your smart home devices are connected to the internet, and that you have a stable internet connection on your mobile device.

Is Exioty Smart Home Application compatible with voice assistants? A5: Depending on its features, Exioty Smart Home Application may integrate with popular voice assistants like Amazon Alexa or Google Assistant, allowing you to control your smart home devices using voice commands.

Depending on its features, Exioty Smart Home Application may integrate with popular voice assistants like Amazon Alexa or Google Assistant, allowing you to control your smart home devices using voice commands.
