EYOYO EY-016Z QA 2D Bluetooth Ring Barcode Scanner Instructions

Contents

EYOYO EY-016Z QA 2D Bluetooth Ring Barcode Scanner

USING INSTURCTION

1. **Charging:**
   - Ensure the device is fully charged before use. Connect it to a power source using the provided USB cable.
2. **Pairing:**
   - Enable Bluetooth on the scanner and the device you want to connect it to (e.g., smartphone, tablet, computer).
   - Put the scanner in pairing mode. This is usually done by holding down a specific button or following a sequence of button presses.
   - On your device, search for available Bluetooth devices and select the scanner from the list.
3. **Scanning:**
   - Once paired, the scanner is ready to use.
   - Aim the scanner at the barcode and press the trigger button (if available) to capture the barcode.
   - Alternatively, some scanners automatically scan when the beam is aligned with a barcode.
4. **Configuring Settings:**
   - Depending on the model, you might be able to configure settings such as scanning mode, data format, and language. Refer to the user manual for specific instructions.
5. **Data Transfer:**
   - After scanning a barcode, the data can be transferred to the connected device. This can be done automatically or by pressing a specific button.
6. **Troubleshooting:**
   - If you encounter issues, consult the troubleshooting section of the user manual or contact the manufacturer's support.

INSTALLATION

1. **Power On the Scanner:**
   - Turn on the barcode scanner using the designated power button.
2. **Enable Bluetooth:**
   - Activate Bluetooth on the scanner. This is usually done through a menu or button on the device.
3. **Pairing with a Device:**
   - Put the scanner in pairing mode. This might involve holding down a specific button or following a particular sequence.
   - On the device you want to connect (e.g., smartphone, tablet, computer), enable Bluetooth and search for available devices.
   - Select the barcode scanner from the list of available devices to establish a Bluetooth connection.
