14. **INDICATOR** – Status indicator, it will be GREEN when connect to computer, and turn RED when device runs.

Software

For professional live streaming or recording, we suggest use OBS, download link: <https://obsproject.com/>

Start Work

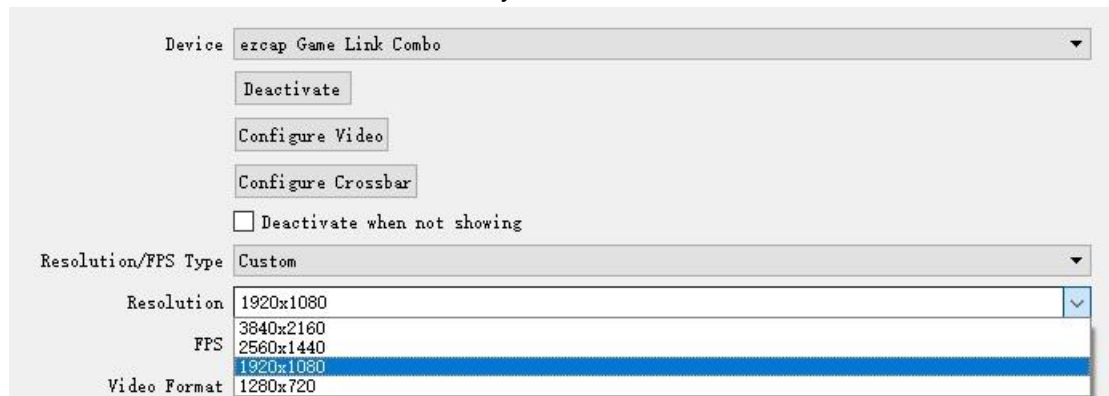

Select Device

After download and installation, double click OBS Studio. Click icon + under Sources window, and select Video Capture Device. Click OK in the new pop-up window. Please click Device and select ezcap Game Link Combo.

Video Setting

You should get the video in window. If not, and you see Check Resolutions Settings on the window, you need to set the video resolution. Click Resolution/FPS Type and select Custom, then click Resolution to select one resolution that same or smaller as the resolution of your video source.

If resolutions of video source and device output are 3840 x 2160, you may find that the viewing picture is way out of the frame of OBS. Right click image window of OBS, select Resize output(source size), and you will get the whole picture.

You can click FPS to select the appropriate FPS – 30,60,Highest FPS, or Match Output

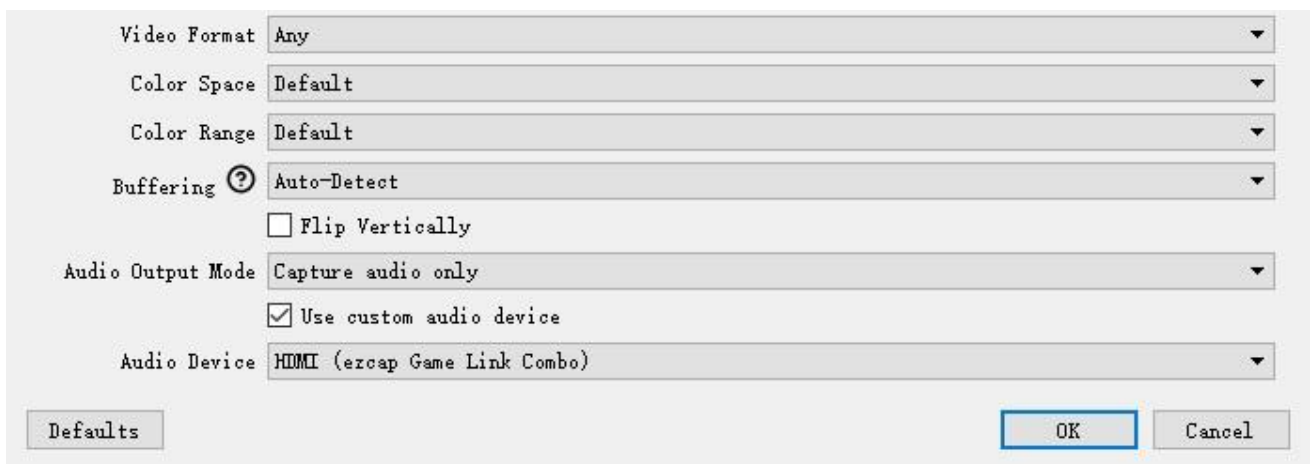

FPS, and click Video Format to select XRGB, NV12,or YUY2.

The video format options depend on resolution, the max FPS depends on both resolution and video format:

	Video Format options	MAX FPS
3840 x 2160	NV12	30
1920 x 1080	NV12	120
	YUY2	60
	XRGB	30
2560 x 1440	NV12	60
	YUY2	50
1280 x 720	NV12	60
	YUY2	60
	XRGB	60

Audio Setting

Please tick Use custom audio device, and click Audio Device and select HDMI (ezcap Game Link Combo), you will hear the sound now.

Video Format: Any

Color Space: Default

Color Range: Default

Buffering ? Auto-Detect

☐ Flip Vertically

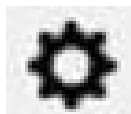

Audio Output Mode: Capture audio only

☒ Use custom audio device

Audio Device: HDMI (ezcap Game Link Combo)

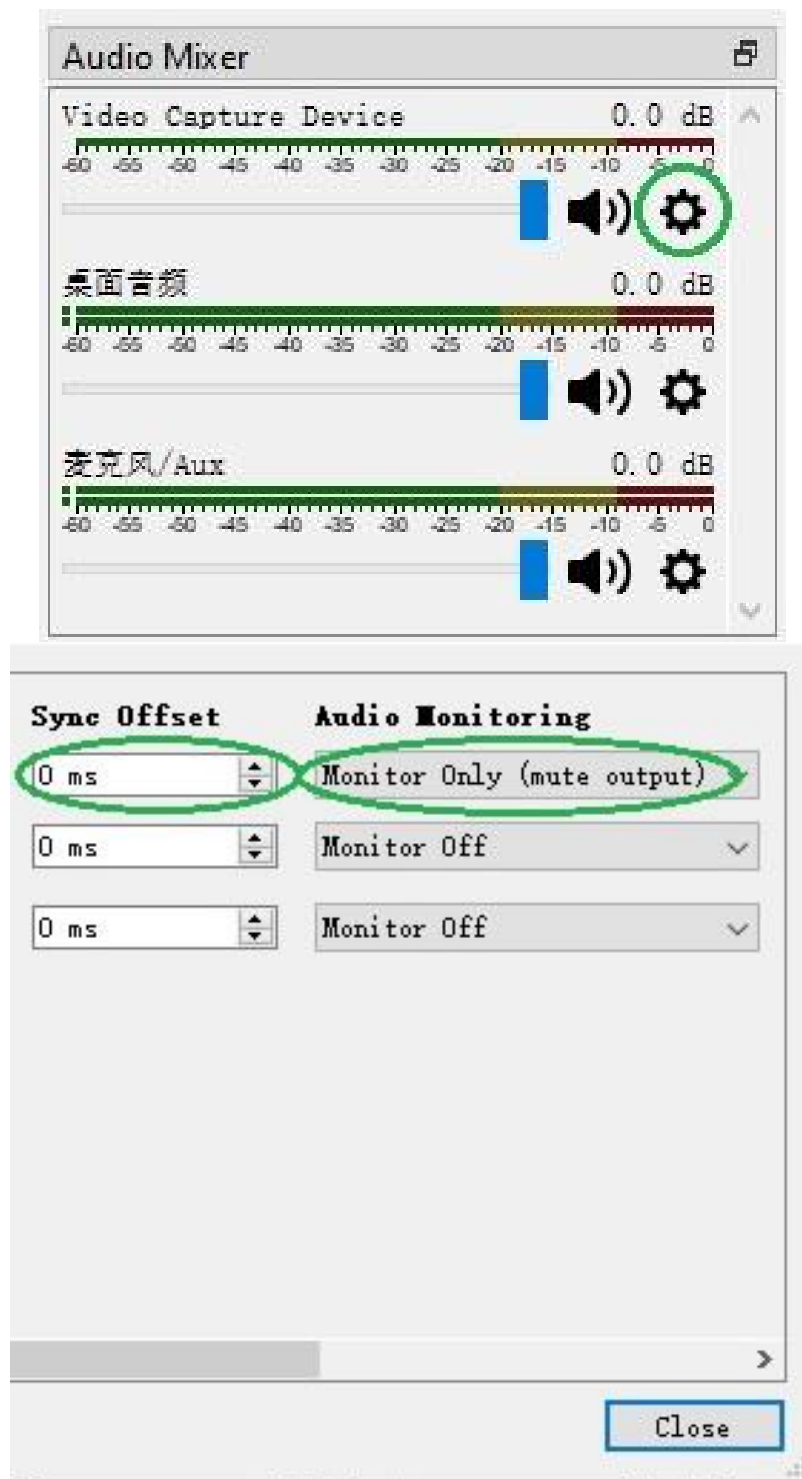

Defaults OK Cancel

If you still cannot hear the sound, please click  under Audio Mixer and Video Capture Device at the bottom middle of OBS panel as below picture and select Advanced Audio Properties. Then click Audio Monitoring and select Monitor Only (mute output).

You still cannot get the sound after above setting, please click Audio Output Mode to select Output desktop audio (WaveOut). You should get the sound.

Please set to -470ms under Sync offset, for audio and video sync, you can adjust it till your audio video is synchronous.

Adjust the volume of HDMI, Microphone and Line in

When we are capturing video or live game, we often need to adjust the microphone volume, or line in volume, or HDMI video volume, and even need to mute them. ezcap Game Link Combo with volume Adjustment has designed unique knobs, you can adjust them at any time to meet your needs. When the corresponding knob is turned fully counterclockwise, the corresponding volume will be muted, and turned fully clockwise, the volume will be adjusted to the maximum.

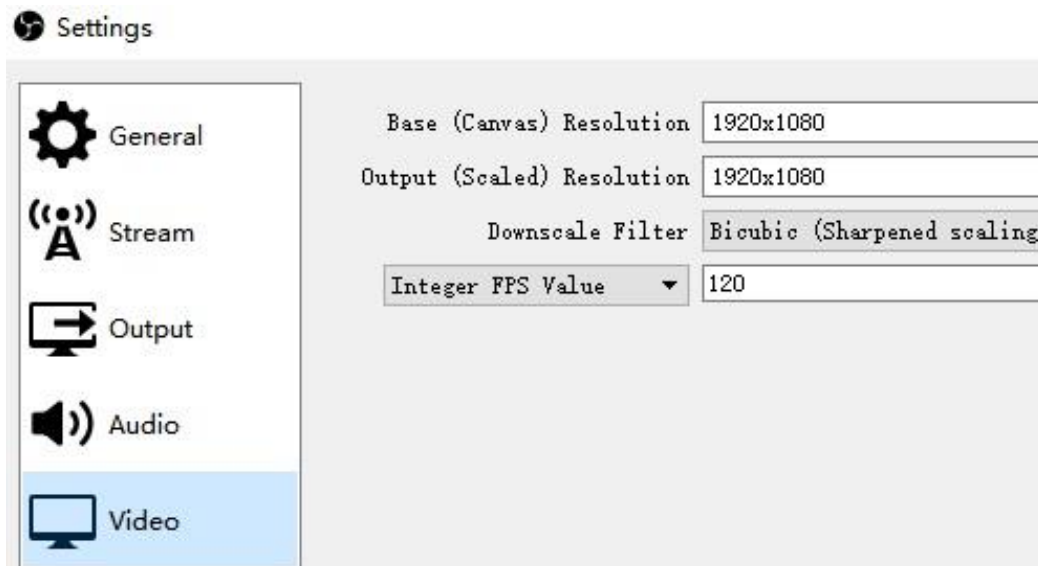

EXAMPLE: You can adjust microphone volume by adjusting the MIC knob. Connect the headset, speak into the microphone, and then adjust the microphone volume knob at the same time until you feel suitable. Turn the knob clockwise to change the volume from low to high, turn it fully counterclockwise, and the microphone will be muted. Note: There may be differences between the volume you hear through the headset and the volume of the actual captured video, as well as the volume of the live broadcast terminal. Please adjust to a suitable position according to the volume of the captured video or the volume of the live broadcast terminal in your actual application.

Microphone sound effect adjustment.

When capture video or live broadcast, you may need to adjust the sound effect of the microphone input. ezcap Game Link Combo includes TREBLE, MIDDLE, BASS and ECHO knobs, and you can adjust the microphone input sound effect according to your needs.

Recording

Click Settings of OBS panel, and click Video. Click Base (canvas) Resolution to select the appropriate resolution, and click Output (Scaled) Resolution to select the output resolution. Click Common FPS Values to select the FPS values. If you want to record 120HZ video, please click Common FPS Values and select Integer FPS Values, then enter 120 in the window on the right.

After setting, click Apply and Ok, then simply click Start Recording to start recording video, and click Stop Recording to stop recording.

Streaming

Click Output in the Settings panel, in the Streaming column, set video quality for streaming (adjust depends your computer, network speed), then click icon Apply and OK. Click Stream, then you can click Service to choose the software platform you want, then click icon Apply and OK.

Click Start Streaming to start streaming, and click Stop Streaming to stop streaming. Note: Please click the help at the top of the OBS, and learn more about OBS.

Documents / Resources

 <p>The image shows the EZCAP-332 Game Link Combo Capture Card. It is a small, grey, rectangular device with a black front panel. The front panel features two circular ports (likely for video and audio) and a USB Type-C port. Above the ports, the text "EZCAP-332" and "Game Link Combo" are visible. A small orange logo is in the top right corner. A watermark "www.manuals.plus" is overlaid on the image.</p>	<p>ezcap Ezcap-332 Game Link Combo Capture Card [pdf] Instruction Manual Ezcap-332, Game Link Combo Capture Card, Ezcap-332 Game Link Combo Capture Card</p>
