V2 23 WiFi Reversing Camera

Thank you for purchasing the Falcon WiFi Reversing Camera.

This user guide will tell you how to correctly use the WiFi Camera and and install the necessary app on your phone / tablet / Falcon Satellite navigation system

Please read the manual carefully before using. We hope you enjoy this system.

Compatible with:

Attaching the Camera to your Motorhome or Caravan

The base of the camera is magnetic, if you have a suitable steel surface you can attach the camera directly to that.

If you don't have a suitable steel surface you can attach the included white steel plate to your vehicle using the included adhesive and then attach the camera to that.

Be sure to apply a thick layer of adhesive and allow at least 24 hours for it to dry before attaching the camera.

Attach the steel plate to vehicle using adhesive

Magnetic base of camera sticks to steel plate
Charging the Camera

To charge your camera pull the orange cover on the rear of the camera to reveal the charging socket and plug the charging lead in.
Connect the other end of the charge lead to the included cigarette lighter adapter or a
USB mobile phone adapter.
The camera should reach a full charge from flat in approximately 4.5 hours.
The LED on the camera is red when the camera is charging and switches off when the camera is fully charged.
After charging be sure to refit the orange rubber cover to the charge socket to prevent water ingress.

Using the Camera with an Apple device

Step 1:
Search the App Store for "SafetyEye" and install the app
Step 2:
Open the app and allow the app permission to access and mange your phone
Step 3:
Turn your camera on using the button on the front, the LED will light up blue when turned on. Select Your Camera on the app.

Step 4:
