**Fancii Nova LED Lighted Makeup Mirror**

## INTRODUCTION

A must-have beauty tool for accuracy and clarity is the Fancii Nova LED Lighted Makeup Mirror. This mirror's dual-sided magnification (1x and 10x) guarantees impeccable grooming, skincare, and makeup application. By simulating natural daylight, it reduces shadows and improves visibility thanks to its "True Daylight" LEDs. The dimmable touch sensor guarantees adjustable brightness, and the 360-degree swivel makes angle adjustments simple.

A rechargeable USB battery powers this high-end mirror, providing up to 17 hours of cordless operation. For energy savings, it also has an automatic shut-off feature that activates after 30 minutes. The 1.77-pound mirror is lightweight and durable, making it ideal for transportation and convenience. The Nova model, made by Fancii, was introduced as a premium yet reasonably priced beauty product for just \$39.99. The Fancii Nova LED Mirror consistently produces a flawless reflection whether you're at home or on the go.

<b>Control Type</b>	Touch sensor
<b>Manufacturer</b>	Fancii
<b>Item Weight</b>	1.77 pounds
<b>Item Model Number</b>	Nova
<b>Batteries</b>	1 Lithium-Ion battery required

## WHAT'S IN THE BOX

- LED Lighted Makeup Mirror
- User Manual

## FEATURES

- **Dual-Sided Magnification:** Both 1x and 10x magnification are available for both common and intricate close-up makeup applications.
- **True Daylight LEDs:** Makeup is applied precisely and flawlessly by simulating natural sunshine.

# True Natural Daylight

Brighter, Clearer & More Color Correct

- **Rechargeable Battery:** A single charge can last up to 17 hours of cordless use.

- **Adjustable Brightness:** Equipped with a sliding touch sensor that controls smooth dimming technology.
- **360-degree Swivel:** This feature enables complete rotation for a variety of viewing angles.

- **Auto Shut-Off Feature:** This feature saves electricity by shutting off on its own after 30 minutes.
- **Portable & Cordless:** It is easy to move around because it doesn't require a cord to function.
- **Touch Sensor Control:** Provides a responsive and easy-to-use touch interface for adjusting illumination.
- **Compact and Lightweight:** At just 1.77 pounds, it's ideal for usage at home or on the go.
- **Dimmable LED Light:** The brightness can be changed to accommodate various lighting conditions.
- **Large Mirror Surface:** The viewing area is broad thanks to the 12.42" x 8.52" dimensions.
- **Superior Construction:** Constructed from robust materials for enduring functionality.
- **Eco-Friendly Design:** Disposable battery waste is decreased using rechargeable lithium-ion batteries.
- **Elegant and Modern Look:** Any vanity or tabletop is enhanced by a sleek, simple design.
- **USB Charging:** A USB charging socket is included for easy recharging.

## SETUP GUIDE

- **Unpack the Mirror:** Take the mirror and its attachments out of the box with care.
- **Charge Before First Use:** Before using the mirror for the first time, make sure the battery is completely charged using the USB cord that comes with it.
- **Position on a Flat Surface:** For safe use, place the mirror on a sturdy table or vanity.
- **Activate the LED Light:** To activate the LED light, use the touch sensor control.
- **Change the Brightness:** To change the brightness, move your finger across the touch sensor.

- **Select Magnification Mode:** For everyday applications, use the 1x side; for precise operations, use the 10x side.
- **Swivel for Best Angle:** To determine the ideal angle, turn the mirror 360 degrees.
- **Test Auto Shut-Off:** To see if the mirror shuts off on its own, leave it on for thirty minutes.
- **Ensure Proper Lighting:** For the finest makeup application and reflection, use in a well-lit area.
- **Use a Power Bank if Necessary:** In an emergency, a portable USB power bank can be used to power the mirror.
- **Secure the Base:** To keep the base from toppling over, make sure it is positioned firmly.
- **Keep Away from Water:** To prevent damage, keep it away from sinks and moist locations.
- **Verify Battery Indicator:** Certain versions warn of limited battery life; charge as necessary.
- **Turn Off When Not in Use:** Despite its automatic shut-off feature, turning it off by hand can help preserve battery life.
- **Store Correctly:** To avoid damage, keep the mirror upright in a cool, dry location while not in use.

## CARE & MAINTENANCE

- **Regularly Clean the Mirror:** Wipe off dust and fingerprints with a gentle microfiber cloth.
- **Steer Clear of Harsh Chemicals:** Cleaners including alcohol or ammonia should be avoided since they can harm the mirror.
- **Gently Wipe the Frame:** To clean the frame and base, use a moist towel.

- **Recharge as Needed:** To keep the battery functioning properly, make sure it is charged on a regular basis.
- **Store in a Secure Place:** Keep the mirror out of direct sunlight and extremely hot or cold environments.
- **Handle Carefully:** To prevent breaking or damaging the LED lights, do not drop the mirror.
- **Maintain Clean Ports:** To keep the USB charging port clean, use compressed air or a little brush.
- **Avoid Overcharging:** Unplug the charger after the battery is fully charged to prolong its life.
- **Avoid Water Contact:** Keep it dry at all times because it's an electronic gadget.
- **Rotate Gently:** To avoid loosening with time, the 360-degree swivel should be utilized softly.
- **Dust the Base Often:** To keep the base stable, keep it clear of dust.
- **Replace Battery if Needed:** Swap out the rechargeable battery for a compatible one if it starts to lose its effectiveness.
- **Check for Loose Parts:** Check for loose fittings or screws on a regular basis, and tighten them if necessary.
- **Turn Off After Use:** By manually shutting off the mirror, you may prolong the life of the LED and battery.
- **Keep Away from Pets & Children:** Keep the mirror out of the reach of children and pets to avoid unintentional harm.

## TROUBLESHOOTING

Issue	Possible Cause	Solution
Mirror won't turn on	Battery is not charged	Charge the battery using the USB cable
LED lights flickering	Low battery power	Recharge the mirror fully
Touch sensor unresponsive	Smudges or dirt on sensor area	Clean the touch sensor with a soft cloth
Dim lighting	Low brightness setting	Adjust brightness using the touch sensor
Auto shut-off too soon	Timer activated unexpectedly	Restart the mirror and check settings
Uneven lighting	LED issue or poor charging	Ensure a full charge before use
Swivel too tight	Factory setting stiffness	Rotate gently to loosen up movement
Battery drains quickly	Frequent high-brightness usage	Reduce brightness or charge more often
10x magnification blurry	Incorrect distance from mirror	Adjust distance for better focus
USB charging not working	Faulty cable or port	Try a different cable and check port

## PROS & CONS

### Pros

- Dual-sided magnification (1x & 10x) for precision
- "True Daylight" LEDs for natural lighting
- Dimmable brightness with touch sensor control
- Rechargeable battery with up to 17 hours of cordless use
- 360-degree swivel for adjustable angles

### Cons

- 10x magnification may cause slight distortion if too close
- Auto shut-off may be inconvenient for long sessions
- Battery requires charging before first use
- Not ideal for full-face makeup due to smaller size
- Doesn't support direct plug-in use while operating

## WARRANTY

Fancii offers a **one-year limited warranty** on the Nova LED Lighted Makeup Mirror. This warranty covers manufacturing defects, including LED malfunctions, touch sensor issues, and structural faults. However, it does not cover accidental damage, misuse, or battery-related wear over time. Customers can reach out to Fancii's customer support with proof of purchase for warranty claims.

## FREQUENTLY ASKED QUESTIONS

How does the magnification work on the Fancii Nova LED Lighted Makeup Mirror?

The mirror has two sides: 1x for a normal reflection and 10x for precise makeup application, tweezing, and detailed grooming.

What type of lighting does the Fancii Nova LED Lighted Makeup Mirror use?

It uses True Daylight LEDs, which simulate natural daylight for accurate makeup application and enhanced visibility.

How is the brightness adjusted on the Fancii Nova LED Lighted Makeup Mirror?

The brightness is dimmable and controlled via a touch sensor, allowing users to adjust the lighting to their preference.

Is the Fancii Nova LED Lighted Makeup Mirror rechargeable?

It has a rechargeable battery (USB-powered), eliminating the need for constant battery replacements.

How long does the battery last on the Fancii Nova LED Lighted Makeup Mirror?

It offers up to 17 hours of cordless use on a full charge, making it ideal for daily use and travel.

Why is my Fancii Nova LED Lighted Makeup Mirror not turning on?

Ensure the mirror is charged and the power button is working. If the battery is low, plug it into a USB charger and try again.

What should I do if the touch sensor on my Fancii Nova LED Lighted Makeup Mirror is unresponsive?

Wipe the touch sensor area with a clean, dry cloth to remove any dust or smudges. If the issue persists, try resetting the mirror by turning it off and on.

Why is my Fancii Nova LED Lighted Makeup Mirror not holding a charge?

If the mirror is not charging properly, check the USB cable and power source. Try using a different USB adapter to see if the issue is with the charger.
