G6 Plus Overview

Trigger Button

Press and hold	Lock mode
Double tap	Reset

Accessories

- Scan QR codes to download a detailed manual for more usage of the gimbal.

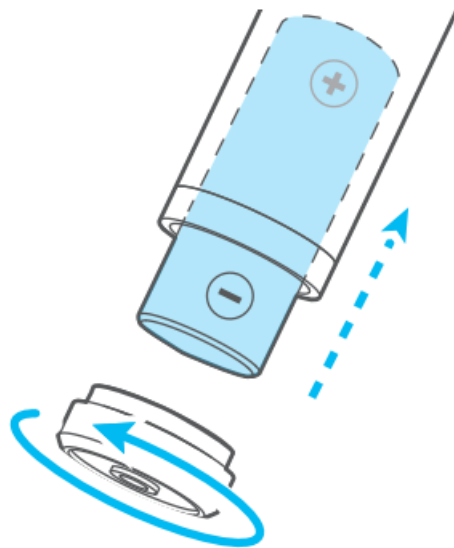

User Guide

TIPS

1. Please mount the camera or smartphone before powering on the gimbal.
2. When the battery is low, please charge the gimbal.
3. When not in use, turn off the gimbal and then remove the battery.

Install Battery

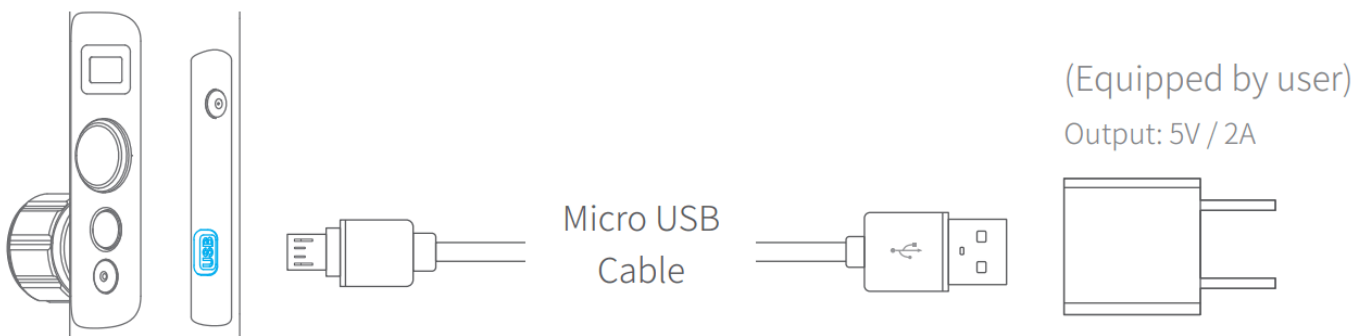

Remove the bottom cap, insert a 26650 battery and then tighten the cap.

Battery Model 26650 Li-ion Battery

Charging

Please fully charge the battery before powering on the gimbal for the first time.
Charging with Micro USB cable.

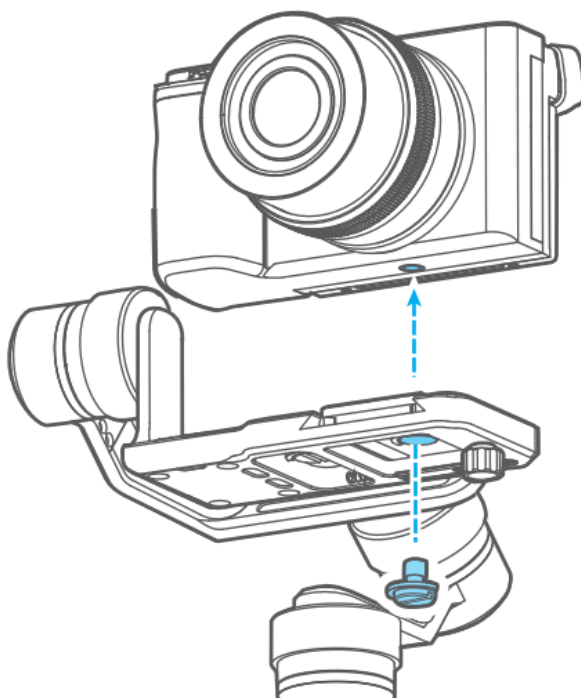

Put the Camera / Smartphone on

Correctly place the camera on the adjustment sliding plate, and tighten it with a thumb screw in the middle sliding

chute.

If the camera doesn't have the 1/4-20 screw hole, please put the camera on the mount adapter, which has a 1/4-20 screw hole, and then mount it following the above steps.

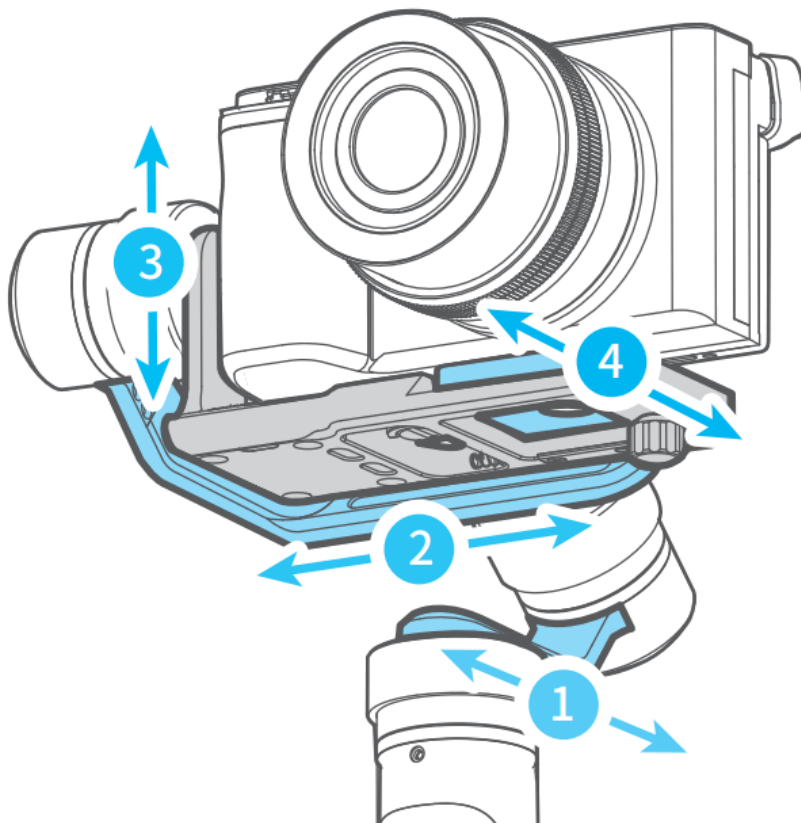

You can also put your smartphone on the smartphone adapter(Optional accessory), then mount it following the above steps.

Balance the Gimbal (Before power on)

Slightly adjust the positions of the vertical arm, cross arm, sliding arm, and adjustment sliding plate, and power on the gimbal after the center of gravity of 3 axes is balanced.

Scan QR codes to download the detailed manual and refer to the chapter "Balance the Gimbal" for the operation.

Steps

- Vertical Arm
- Cross Arm
- Sliding Arm
- Adjustment
- Sliding Plate

Power on / off

Long press the function button, and the display will show  and release it when you hear the beep tone.
