3. Do not store the equipment in extremely hot or cold areas. Recommended for use at room temperature.
4. Do not attempt to repair, repair or disassemble the device by yourself.
5. Ensure that you comply with the technical specifications for charging and do not use a power adapter whose output voltage exceeds the specified value to avoid any irreversible damage to the internal circuit (DC input voltage: 5V).

Product specification

- Material Plastic
- Weight 200g / 0.44lbs
- Size 124.7*90.8*38.2mm
- Battery capacity :1200 mAh

- Charging system USB Type C interface
- Charging time (USBC type) about 3 hours
- Normal battery life up to 8h
- Bluetooth® (Bluetooth) can be connected range: 8m
- frequency range: 2402M-2480MHZ
- Input interface: USB C
- Battery type: lithium polymer
- Battery voltage: 3.7V
- Operating temperature: 0°C -45°C
- International guarantee :1 year

FCC warning

This device complies with Part 15 of the FCC Rules.
Operation meets the following two conditions:

1. This equipment does not produce harmful interference, and
2. this equipment must accept any interference received, including interference that may cause unintended operation. Any change or modification without the express approval of the responsible party for compliance may give the user no right to operate the equipment.

Note: This device has been tested to comply with the restrictions on Class B digital devices in Part 15 of the FCC Rules. These restrictions are intended to provide reasonable protection against harmful disturbances in residential installations. The device produces uses and can radiate RF energy, which, if not installed and used according to instructions, may cause harmful interference with radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this device does cause harmful interference with radio or television reception (which can be determined by turning off and lifting the device), users are advised to try to correct the interference by one or more of the following measures:

1. Readjust or place the receiving antenna.
2. Increase the distance between device and receiver.
3. Connect the device to a circuit socket different from the circuit connected to the receiver.
4. Consult a dealer or experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
