## FISHER & PAYKEL

FISHER AND PAYKEL EB24MSB1 9 Minimal Built In Coffee Maker

## Product Usage Instructions

### 1. Setting Up the Built-in Coffee Maker

To set up the coffee maker, follow these steps:

1. Place the coffee maker in a suitable location with access to power and water.
2. Fill the water tank with clean water and the coffee bean container with your preferred coffee beans.
3. Connect the coffee maker to a power source.
4. Follow the initial setup instructions on the touch display to configure your preferences.

### 2. Making Coffee

To make coffee using the built-in coffee maker:

1. Select your desired coffee type from the available options on the touch display.
2. Adjust any additional settings such as cup size and coffee strength.
3. Press the start button to begin the brewing process.
4. Wait for the coffee maker to finish brewing your coffee.
5. Enjoy your freshly brewed coffee!

### 3. Cleaning and Maintenance

To keep your coffee maker in optimal condition:

1. Regularly empty and clean the drip tray and grounds container.
2. Use the self-cleaning function as recommended in the user manual.
3. Descale the machine using the provided descaling agent at regular intervals.
4. Refer to the user manual for specific cleaning instructions.

## FAQs

### **Q: How often should I descale the coffee maker?**

A: It is recommended to descale the coffee maker every 3 months or as needed based on usage frequency and water hardness in your area.

### **Q: Can I use pre-ground coffee with this machine?**

A: Yes, the built-in coffee maker is designed to accommodate pre-ground coffee in addition to whole beans.

### **Q: How do I program the coffee maker to start brewing at a specific time?**

A: You can use the programmable timer feature on the touch display to set a specific start time for brewing your coffee.

## Where applicable:

All appliances use energy, and energy usage typically generates carbon emissions. Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region. Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
