## Where applicable:

All appliances use energy, and energy usage typically generates carbon emissions. Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region. Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.

## A PEACE OF MIND SALE

## FAQs

**Q: How often should I descale the coffee maker?**

A: It is recommended to descale the coffee maker every 2-3 months depending on usage frequency and water hardness in your area.

**Q: Can I use pre-ground coffee with this coffee maker?**

A: Yes, the coffee maker supports pre-ground coffee in addition to coffee beans. Select the “Takes pre ground coffee” function from the menu for this option.

**Q: How do I adjust the coffee temperature settings?**

A: Navigate to the settings menu on the touch display and select the desired temperature level from the available options.
