## FISHER & PAYKEL

### FISHER and PAYKEL OB90S9MEPB1 90cm 9 Function Self-Cleaning Built-In Oven

This Series 9 oven provides ample capacity for diverse cooking needs, featuring nine functions including Pastry Bake, Rotisserie, and Fan Bake.

- Generous 100L total capacity, with nine oven functions
- Pyrolytic self-cleaning function breaks down food residue for an easy clean

- Built-in professional-grade rotisserie

## **DIMENSIONS**

- Height 478 mm
- Width 895 mm
- Depth 564 mm

## **FEATURES & BENEFITS**

### **Cooking flexibility**

This built-in oven has nine functions with pre-set temperatures, including Bake, Pastry Bake, and Fan Forced, allowing you to use a variety of cooking styles.

### **Optimal Performance**

Oven functions are pre-set with a simple touch of a dial. Enhanced by brilliant lighting and a large viewing window, the need to open the oven door is minimized, ensuring perfect cooking results while maintaining the oven's internal temperature.

### **Generous Capacity**

Designed for multi-shelf cooking, this built-in oven provides a 100L total capacity. The wide cavity allows for both side-by side and multi-shelf cooking.

### **Self-Cleaning**

Our self-clean technology breaks down food residue at a very high temperature, leaving a light ash that's easily removed with a damp cloth. The enamel-coated side racks don't need to be removed when using this function.

### **Even cooking**

Our ovens feature AeroTech™, a technology that circulates heat evenly, ideal for multi-shelf cooking. The professional quality rotisserie roasts meat to succulent perfection, and a powerful grill ensures even and quick browning results.

### **Complementary design**

With their premium handle styling and sleek black finish, our built-in ovens are designed to match the rest of Fisher & Paykel's kitchen appliance family.

## **SPECIFICATIONS**

### **Accessories (included)**

## Where applicable

All appliances use energy, and energy usage typically generates carbon emissions. Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region. Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
