FIXED CZ Signal Bluetooth AUDIO Receiver

Product Information

The FIXED SIGNAL is an audio receiver that allows you to connect your phone or other Bluetooth-enabled devices to your car or speaker wirelessly. It supports Bluetooth version 5.1 and Bluetooth protocols A2DP and AVRCP. The device has a range of up to 10 meters and requires DC 5V 1A input. The dimensions of the device

are 32 mm*17 mm*8.5 mm. The package includes the audio receiver and a user manual.

Product Usage

To use the FIXED SIGNAL audio receiver, follow these instructions:

1. Connect one end of the 3.5mm jack audio cable to the audio interface of the FIXED SIGNAL audio receiver and the other end to the 3.5mm jack audio interface of your car or speaker.
2. Plug the adapter itself into the USB interface for power.
3. Pair your phone with the audio receiver via Bluetooth.

Note that the USB interface of a car or USB speaker interface must support USB audio output. The LED on the audio receiver will blink blue during pairing and stay blue after pairing is complete.

Product Care and Maintenance

To clean the body of the adapter, use a soft cloth. Do not use any abrasive cleaners or solvents as they may damage the device.

Safety Precautions

Do not disassemble or modify the device as it will void the warranty. Use the device only as intended and do not use it in any way that may cause harm to yourself or others. Keep the device away from children and pets. In case of any problems with the product, contact the dealer from which you purchased the product.

FIXED SIGNAL

Thank you for purchasing the FIXED Signal Bluetooth audio receiver. The FIXED audio receiver is a great accessory for Bluetooth connection of a car radio, speaker or another device with a 3.5mm jack with your smartphone. It is the ideal solution for smartphones that do not have a 3.5mm jack, or for those who are tired of having to constantly connect the cables. Just connect the receiver to your 3.5mm the audio device, connect it via Bluetooth to your smartphone or tablet, and enjoy wireless listening to music. The miniature design and versatile use make the Bluetooth receiver a great accessory for everyday use.

Use

RECEIVER – AUX mode

The AUX mode requires you to connect one end of the 3.5mm jack audio cable to the audio interface of the FIXED Signal audio receiver and the other end to the 3.5mm jack audio interface of your car or speaker. Plug the adapter itself into the USB interface for power. Then pair your phone with the audio receiver via Bluetooth.

- Turn on the Bluetooth function on your phone and then search for the FIXED Signal device.
- If the connection is successful, a message requesting pairing the FIXED Signal with your device will appear on the display.
- Pair the device and the pairing process is complete.
- Now you can start broadcasting music to the receiver or start making phone calls.

RECEIVER – USB mode

The USB mode does not require the use of a 3.5mm jack audio cable. It can be directly plugged into the car's USB interface and USB speaker and can be used directly after pairing with a mobile phone.

Note: The USB interface of a car or USB speaker interface must support USB audio output.
