TRICK SHOT

Welcome to the world of trick shots, from hitting a bullseye to threading the needle. There's no feeling quite like hitting the perfect trick shot even if it is on the 1st or 21st attempt. The viral online trend of trick shots took the virtual world by storm, Trick Shot The Game brings that reality to your home! This starter pack will give you the tools and foundation to develop your inner trick shot abilities.

Within the box, you will be exploring the 4 key pillars of the trick shot world, Aerial, Accuracy, Bounce and Target. All crafted and designed to test the strongest of nerves as you compete against friends and family.

So, what's in your box?

**Stacking
Cups**

**Sticky
Darts**

**Colourful
Ping Pong
Balls**

**Small
Throwing
Disk**

Cards

HOW TO PLAY, THE BASICS

Start by making sure the environment you are playing in is safe to play in. We highly recommend an open space and definitely don't play near your expensive valuables (even if you are a pro).

When you have your environment all sorted, remove the cards from the box and give them a good shuffle!

Each card will show you at the bottom what items you need to set up each trick shot Top tip: Want to play outside? Use the Trick shot box as a backboard or a flat surface, this game is all about having fun and pushing the limits of what is possible.

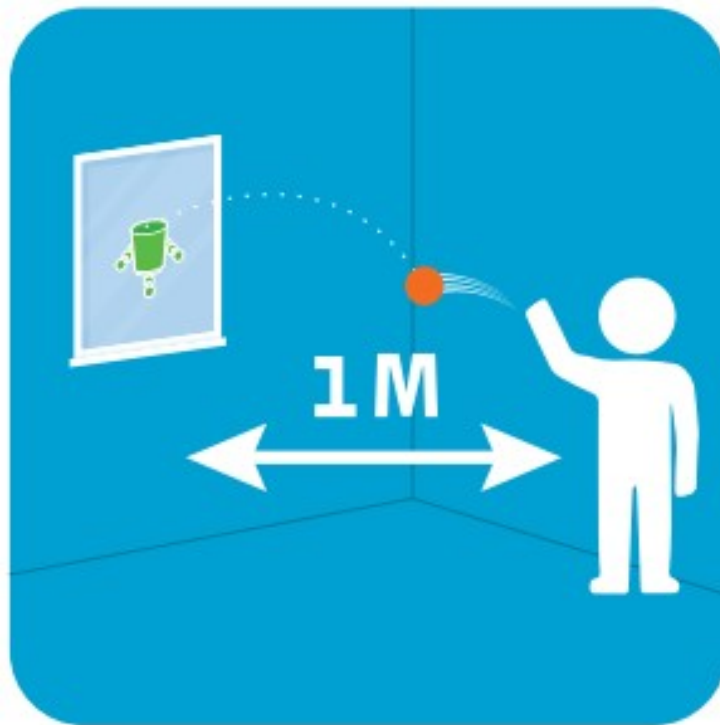

Step 2 **The aim of the game**

Trick Shot The Game has 5 simple steps to play, the real challenge comes from the trick shots.

1. Take a challenge card

2. Set it up as shown on the card,

3. Attempt the trick shot. Each player attempts the shot once then it is the next player's turn. This is repeated until the shot is complete.

4. The player that completes the trick shot in the fewest number of attempts wins that card as the reward. Keep hold of the card until the end of the game.

5. Select a new card from the top of the pile to start the next round. For a long game, we recommend attempting 15 challenges. A medium game has 10 challenges and a short game is 5 challenges.

Note if the challenge is not completed in 5 turns by each player this card is abandoned. Place the card to one side and select a new card from the pile.

Some cards are made up of 2 or even 3 parts. All parts must be completed simultaneously to win the challenge.

Step 3 – Who is the winner?

Depending on the length of the game you have selected, after the 5, 10, or 15 challenge cards have been attempted, the game is over.

Points are awarded based on the difficulty level of the challenge.

This is shown on the top of the challenge card in this graphic.

From left to right the points are scored 1-5. For example, green is 1 point and red is 5. Players must calculate how many points they have from the cards they have won. 'The skill level EXTREME' card is the hardest trick shot in the game. Successfully completing this challenge will win your team 10 points!

The winner is the player with the most points at the end of the game.

Added extras!

Special cards (for the professional):

For an extra challenge, in a second pile, shuffle all the special cards together (as seen to the right). Select one card from the challenge pile and one from the special card pile and attempt the shot.

Create your own cards:

Get creative and use your environment to tailor-make custom trick shots. Why not add even more of a challenge to Trick Shot and see what you have about your home from mugs to saucepans? Wherever your imagination takes you be sure to capture it on the customisable trick shots cards and be sure to send them to tag us!

#fizzcreations

Good to know:

You can play Trick Shot in teams, to do this divide into two even-number teams and nominate one player from each team to compete in a head-to-head each round. Some cards will also require 2 players for the challenge.

This is shown by 'Player 1' and 'Player 2' on the challenge card.

If a two-player challenge card is selected when you are not playing in the team mode, simply remove it from the pile and select a new challenge.
