**FLEXISPOT 150 Quick Assembly Electric Standing Desk**

**Launch Date:** January 2024

**Price:** \$239.00

## Introduction

The FLEXISPOT 150 Quick Assembly Electric Standing Desk is a unique way to make a flexible and healthy work place. This desk has a dual motor electric height adjusting system that makes it easy to move from a sitting position to a standing position. It was made to be modern and easy to use. The 48"x24" tabletop gives you plenty of space for all of your office tools, like your computer, keyboard, and other things. The modern style, with a bamboo-textured top and a white frame, makes any area look better, like a home office or a study room. Simple tools are not needed to put together the desk quickly, so you can get it up and running right away. Built-in storage hooks and cable management also help keep your room clean and organized. The FLEXISPOT 150 is made from solid wood, so it will last and be stable. It can hold up to 110 pounds. The desk can be used in a variety of rooms and fits the needs of different users. The FLEXISPOT 150 Quick Assembly Electric Standing Desk is a great choice for people who want a desk that works well and looks good. It has a simple, modern design.

- Assembly Tools: Not included (requires basic assembly tools)
- Instruction Manual: For easy, step-by-step assembly guidance
- Storage Options: Built-in cord management and hooks
- Additional Features: One open shelf, one built-in cabinet

### **Features**

## ENHANCED LIFT SYSTEM

Advanced lifting system ensures the maximum stability even at the highest setting

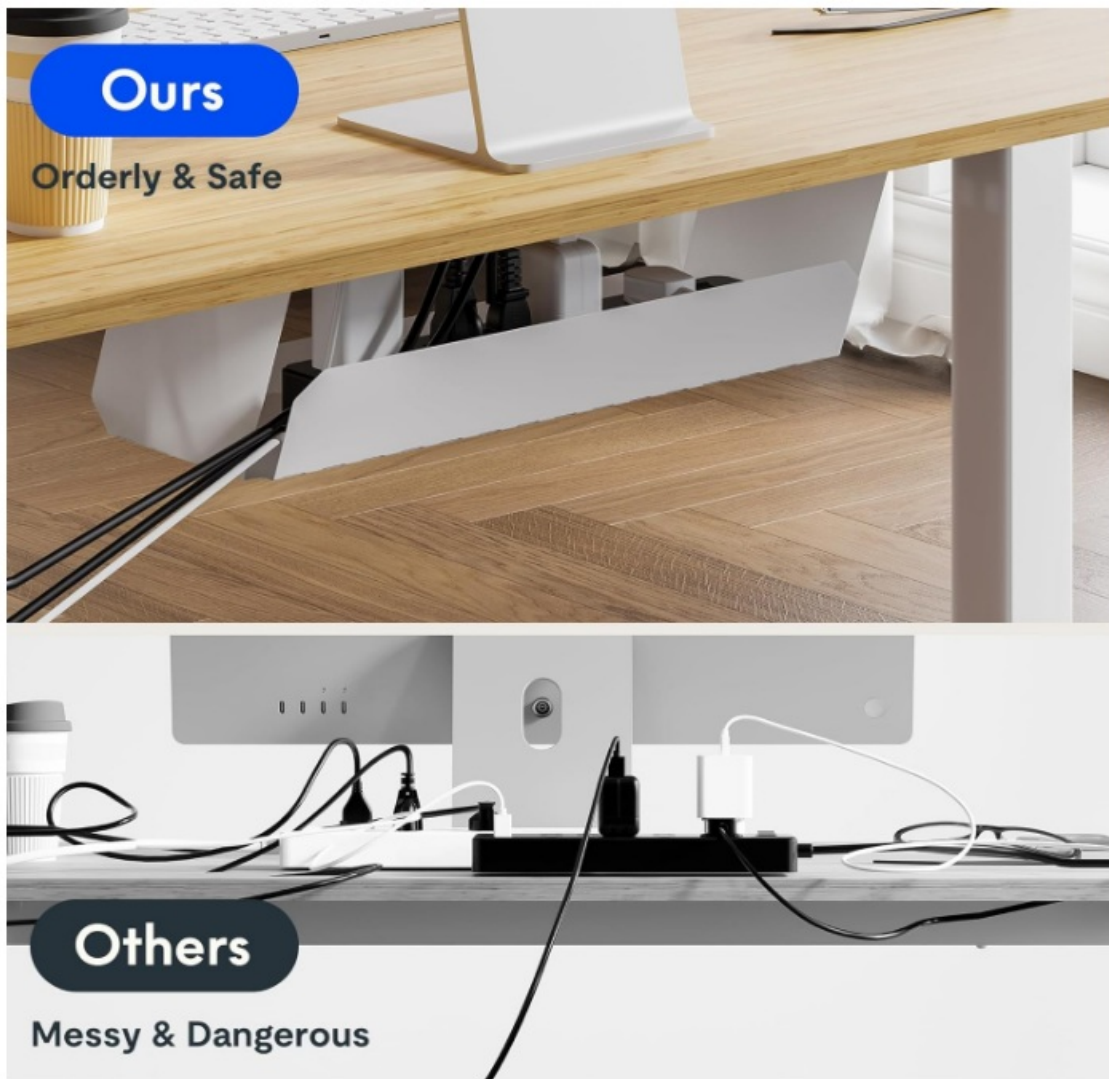

1. **Electric Height Adjustment:** The FLEXISPOT 150 has two motors that work together to make changes between 28.3" and 47.6" that are smooth and quiet. The ability to easily switch between sitting and standing positions with the push of a button makes the workplace more lively and healthy.
2. **Quick Assembly:** The desk is made to be set up quickly and easily, without the need for any difficult tools. If you use the FLEXISPOT 150, you can put together your desk much faster than with other types, so you can start using it almost as soon as you get it.

# 5-MIN QUICK INSTALLATION

Pre-assembled Parts

3. **Sets for Programmable Height:** The FLEXISPOT 150 has three sets for programmable height that let you save your best heights for sitting and standing. This function gets rid of the need to make adjustments by hand, which makes switching between positions faster and easier.
4. **Large Desktop:** The desk's 48" x 24" tabletop gives you plenty of room for your monitor, keyboard, mouse, and other office necessities. It comes in different styles, like white, walnut, bamboo, and gray wood grain, so you can pick the one that looks best in your office.
5. **Durable Construction:** The desk is stable and will last a long time thanks to its alloy steel frame and strong MDF wood tabletop. It can hold up to 155 pounds, so you can put your tools and other office supplies on it without worrying about its stability or structure.
6. **Cable Management Tray:** The under-desk cable management tray keeps things neat by giving you lots of room to organize cords and power strips. This feature helps keep your desk clean and organized, so you can focus on your work without having to deal with tangled wires.

7. **Anti-Collision Technology:** The FLEXISPOT 150 has technology that protects it from collisions. This technology makes sure that the desk will stop adjusting its height if it finds something in its way. This method keeps things from getting damaged or the desk from moving while you find the best position for you.
8. **Minimalist One-Piece Desktop:** The FLEXISPOT 150's desktop is made of a single solid board, which makes it strong and stable and gives it a clean, simple look that goes well with modern office designs. No matter how simple it looks, the desk has plenty of room for all of your tools.
9. **6-Button Control Panel:** The 6-button control panel is easy to use and gives you full power over how the desk moves. The panel lets you change the height up and down and has four customizable memory settings as well as USB charging ports (Type A and Type C), so all of your devices stay charged while you work.

## 2 CHARGE HUB

1xUSB Type A, 1xType C

10. **Safe and Strong:** The desk can hold up to 110 pounds and has a height range of 28.7" to 47.6" so it can fit people of different heights. The tabletop is 0.6 inches thick, which makes sure that the desk stays stable even when it is fully stretched. The anti-collision technology keeps the desk and any items put on it from getting damaged by accident while it's moving.
11. **Built-In Cord Management:** The built-in cord management system has a storage box built right in, which makes it easy to keep wires and power strips in order. Two hooks on each side of the desk let you store things like headphones, bags, or cables, which makes your office even cleaner.
12. **Stability Testing:** The FLEXISPOT 150 has been through a lot of tests to make sure it is stable. During these tests, a cup of water was put on the desk's surface while force was sent to it. The desk passed if it didn't move or shake during the test, which showed how strong its structure was.
13. **Testing for Durability:** The desk was also put up and down more than 20,000 times to test how durable it was. Passed the test with no problems and continues to work just as well as the first time, showing that it is of high quality and will last.
14. **Different Sizes and Colors:** The FLEXISPOT 150 comes in four colors (white, walnut, bamboo, and grey wood grain) and three sizes (40", 48", and 55"). This lets you pick the size and style that works best for your workspace and your own tastes.
15. **Desk Hooks:** There are two hooks on each side of the desk, making it easy to store your backpack, headphones, and other important items. This function makes the most of your workspace and makes sure that your things are always close at hand.
16. **Quick and Easy Assembly:** The FLEXISPOT 150 is made to be set up quickly. It comes with all the parts you need and a quick-install guide that will help you get your desk up and running in less than five minutes. Since you don't need any other tools, it's the best solution for people who want an easy and quick setup.

## Usage

The **FLEXISPOT 150 Quick Assembly Electric Standing Desk** is designed for those who spend long hours at a desk and want to alternate between sitting and standing to reduce discomfort. Ideal for use in **home offices**, **corporate workspaces**, or even **educational settings**, it is perfect for anyone looking to improve posture, reduce back pain, and boost productivity. You can use it to hold computers, monitors, keyboards, and other office tools. With its **programmable presets** you can easily set it to your preferred height and switch between sitting and standing throughout your workday.

## Care and Maintenance

1. **Cleaning:** Clean the desk surface with a **soft, damp cloth** and avoid harsh chemicals or abrasive cleaning products to maintain the finish.
2. **Motor Maintenance:** Periodically check the motor and moving parts for any debris or obstructions to ensure smooth operation.
3. **Frame:** Wipe down the steel frame with a clean cloth to remove dust and prevent buildup.
4. **Cable Management:** Ensure that the cable management tray is regularly cleared to prevent clutter and tangled cables.
5. **Tabletop Care:** For wooden surfaces, apply a **wood polish** occasionally to keep the finish looking fresh.
6. **Height Adjustment:** Avoid placing excessive weight or force on the desk while adjusting the height to prevent damage to the lifting mechanism.

## Troubleshooting

### Desk Doesn't Adjust:

- **Cause:** The motor is not receiving power.
- **Solution:** Ensure the desk is plugged into a power source and the power switch is turned on.

### Desk Adjusts Slowly or Unevenly:

- **Cause:** Possible obstruction or uneven weight distribution.
- **Solution:** Check for any obstructions under or around the desk and ensure that the weight is evenly distributed across the surface.

### Preset Buttons Not Working:

- **Cause:** Preset settings may not have been saved correctly.
- **Solution:** Press and hold the preset button to save your height settings again.

### Desk Stuck at One Height:

- **Cause:** Motor may need recalibration.
- **Solution:** Reset the desk by following the recalibration process outlined in the manual.

### Control Panel Not Responding:

- **Cause:** The control box may have a loose connection.
- **Solution:** Check the connections between the control panel, motor, and control box. Reconnect if necessary.

**Desk Makes Unusual Noises :**

- **Cause:** Loose parts or debris in the mechanism.
- **Solution:** Tighten any loose screws and clear debris from the motor and lifting mechanism.

**Pros and Cons**

Pros	Cons
Easy assembly without tools	Limited color options
Ergonomic benefits	Weight capacity may be restrictive
Memory presets for convenience	Some users may find it less stable at maximum height

**Warranty**

The FLEXISPOT 150 comes with a standard warranty of 5 years on frame and motor components, ensuring peace of mind with your purchase.

**FAQs**
