FLYHOOM H60USB-2 Rechargeable Light Bulb

INTRODUCTION

During power outages and outdoor excursions, the FLYHOOM H60USB-2 Rechargeable Light Bulb will help you bid darkness farewell. This USB-powered LED bulb, which is reasonably priced at **$18.98** for a 2-pack, provides consistent lighting with contemporary ease. Each bulb, which is made by Flyhoom Direct and was introduced to offer a variety of lighting options, has a 1200mAh rechargeable battery that can run for 4 to 15 hours, depending on the brightness setting. These bulbs are ideal for camping, tents, or indoor crises because they include four light modes, including SOS for emergencies, and four timer settings (15, 30, 60, and 240 minutes). With its 16-foot remote control range, controlling the lighting without getting up is simple. Shaped like a typical A19 bulb, it weighs only 3.35 oz, is easy to hang, and uses little energy. This rechargeable LED bulb is a useful, environmentally responsible lighting option for any home, whether it is used indoors or outdoors.

SPECIFICATIONS

FEATURES

- **Built-in Rechargeable Battery:** Each bulb is powered by a 1200mAh battery, so you don't need to worry about plugging it in.
- **Extended Runtime:** Depending on the brightness level, the bulb can last anywhere from 4 to 15 hours on a single charge.

3-Level Brightness + SOS Mode
for home, room, indoor, caming, hiking etc

4 hrs	8-10 hrs	15 hrs	5 hrs
High Mode / 180 lm	Medium Mode / 100 lm	Low Mode / 20 lm	SOS Mode

- **Multiple Light Modes:** Choose from high, medium, low, or SOS flashing for emergencies—great for different needs and settings.
- **Remote Operated:** You can control the bulb's settings from a distance (up to 16 feet) using the included remote.

Easy To Use by Remote Control

The top switch button can also switch the brightness of the light

- **Auto Shut-Off Timer:** Easily set the bulb to turn off automatically after 15, 30, 60, or 240 minutes to save power.
- **Lightweight & Compact:** Each bulb weighs only 3.35 oz and is small enough to fit in your hand or backpack.
- **Easy USB Charging:** Recharge it using any USB port or even a compatible 5V/6V solar panel while off-grid.
- **Great for Camping:** Its hangable design and reliable light make it perfect for lighting up tents or campsites.
- **Versatile Usage:** Whether you're at home, camping, or facing a power outage, these bulbs have you covered.

- **Energy Efficient Brightness:** The bulb gives off a maximum of 180 lumens using only 7 watts of power.
- **Cool White Light:** Emits a clean 6000K daylight color, making it ideal for visibility in dark spaces.
- **Safe Low Voltage:** Works on 5V DC input, making it safe for use around the house and outdoors.
- **Simple Control Options:** Use the button on the bulb or the remote for easy access to all settings.
- **Durable Plastic Shell:** Made with quality plastic and a polished finish for long-lasting performance.
- **Certified Quality:** Complies with CE safety standards for peace of mind.

SETUP GUIDE

- **Unbox the Package:** Open the box to find the bulbs, USB cable, and remote control inside.
- **Charge the Bulbs:** Plug each bulb into a USB power source until fully charged before first use.
- **Look for the Indicator:** Some bulbs may have an indicator light to let you know when charging is complete.
- **Test Light Modes:** Press the power button or use the remote to toggle between brightness settings and SOS mode.
- **Hang It Easily:** Use the hook at the top to hang the bulb in a tent, closet, or any space that needs light.
- **Remote Setup:** Make sure you're within 16 feet to control the bulb via the remote.
- **Set the Timer:** Use the remote to program the bulb to shut off automatically at your chosen time.
- **Use Indoors or Outdoors:** Works well in bedrooms, camping tents, or during power cuts at home.
- **Switch Power Sources:** Recharge the bulb using either USB power or a compatible solar panel.
- **Adjust Brightness for Battery Life:** Use medium or low settings to extend usage time between charges.
- **Activate Sleep Mode:** Switch the bulb to sleep mode when not in use to save battery.
- **Check Power Source:** Always use a stable 5V USB source to prevent charging issues.
- **Avoid Wet Areas:** Since the bulb isn't waterproof, only use it in dry spaces or under covered areas.
- **Pair with a Power Bank:** Ideal for portable use during outdoor activities with a power bank.
- **Check Remote Batteries:** Ensure the remote is working properly before heading outdoors or on a trip.

CARE & MAINTENANCE

- **Keep It Dry:** Don't expose the bulb to rain or wet conditions to avoid damaging the electronics.
- **Wipe Clean Gently:** Use a dry or slightly damp cloth to remove dust and dirt from the

bulb.

- **Skip Strong Cleaners:** Avoid using alcohol, bleach, or any harsh cleaning agents on the plastic casing.
- **Charge Regularly:** Keep the battery topped up by charging it after each use.
- **Store in a Safe Spot:** Place the bulbs in a cool, dry place when not in use.
- **Don't Over-Drain the Battery:** Try not to let the battery completely run out too often —this helps preserve its lifespan.
- **Clean the USB Port:** Occasionally, check the USB port for dust or dirt and clean it out carefully.
- **Check for Cable Damage:** Make sure your USB cable stays in good shape and doesn't get frayed or broken.
- **Use the Timer Wisely:** Take advantage of the auto-off timer to prevent unnecessary battery drain.
- **Handle With Care:** Although sturdy, it's best not to drop the bulb or handle it roughly.
- **Label for Use:** Consider labeling one bulb for camping and another for emergencies so you're always ready.
- **Test the Remote Often:** Press a few buttons every now and then to ensure the remote still functions.
- **Keep Away from Sunlight:** Don't leave the bulbs sitting in direct sunlight when not charging via solar.
- **Use the Right Charger:** Stick with a standard 5V USB power supply—avoid fast chargers or adapters not designed for it.
- **Avoid Overcharging:** Once the battery is full, unplug the bulb to keep the battery in good shape.

TROUBLESHOOTING

Issue	Possible Cause	SolutionThe light
Two won't turn on	Battery drained or not charged	Recharge via USB for 3-4 hours
Remote not responding	Dead battery or out of range	Replace the remote battery or stay within 16FT

Issue	Possible Cause	SolutionThe light
The light shuts off suddenly	Timer mode may be active	Check and disable the timer setting
Bulb not charging	Faulty cable or port	Try a different USB cable or port
Only the SOS mode works	Mode memory glitch	Reset by turning off and on manually
Light is dim or weak	Low battery	Fully recharge the light
Cannot switch brightness modes	Remote/button not working properly	Use both remote and manual push buttons
Charging indicator not visible	No indicator feature	Allow full charging time, test function
The remote control intermittently works	Interference or low battery	Replace the battery, avoid obstacles
Light flickers in use	Loose connection or battery issue	Secure USB input and ensure the battery is healthy

PROS & CONS

PROS

- 4 brightness/timer modes for flexible lighting options
- USB rechargeable with long-lasting battery (up to 15 hours)
- Lightweight and portable—ideal for tents and emergencies
- Remote control for convenient operation up to 16FT
- Includes USB cable, remote, and batteries for instant use

CONS

- Not waterproof—unsuitable for wet outdoor conditions

- Brightness may be limited for large spaces
- Plastic material feels light-duty
- No brightness memory function
- Remote range could be better for larger setups

WARRANTY

The FLYHOOM H60USB-2 Rechargeable Light Bulb is backed by Flyhoom's manufacturer's warranty, covering issues related to defects in materials or craftsmanship. Customers can reach out to Flyhoom Direct for any warranty support, with replacements or refunds typically issued for verified issues. Proof of purchase may be required, and warranty duration should be confirmed directly with the seller or included documentation.

FREQUENTLY ASKED QUESTIONS

Does the FLYHOOM H60USB-2 come with a remote control?

It includes a remote control with up to 16 feet range, allowing users to switch modes or set timers from a distance.

Can I use the FLYHOOM H60USB-2 bulb during power outages?

Absolutely. The built-in 1200mAh battery makes the FLYHOOM H60USB-2 ideal for emergencies, blackouts, and off-grid use.

What timer settings are available on the FLYHOOM H60USB-2 light bulb?

You can set the FLYHOOM H60USB-2 to auto turn-off after 15, 30, 60, or 240 minutes using the remote.

Why is my FLYHOOM H60USB-2 turning off randomly?

This may be due to the auto-off timer being active. Check your settings or reset the bulb using the remote control or push button.

How can I extend the life of the battery in my FLYHOOM H60USB-2 light bulb?

For better battery health, use the medium or low mode during extended sessions, and always charge it fully before storing.

Why is the remote not working with my FLYHOOM H60USB-2 bulb?

Make sure the remote is within 16 feet, the battery is not depleted, and there no obstruction between the remote and the bulb.

What does the SOS mode on the FLYHOOM H60USB-2 do?

SOS mode activates a flashing light designed for emergency signaling during outdoor or rescue situations.
