(800)553-5605 **salesganjonponds.com**

Shop our whole line of Ignite Lighting on **www.anjonmfg.com**

a. Single mode:

click' Direct connect the device control'. Then go to control it directly. In single mode , you can only control one controller once time. In addition, your phone' s WiFi controller must keep connection with WiFi controller "LED net******in the meantime

b. Network mode:

Click 'Setting', then set your controllers to WiFi route one by one.After controllers were connected to WiFi router, connect your phone to this WiFi router. Then, open 'Magichome WiErapp, And wait while your phone scans for Wifi controllers which were connected to this Wifi router, Now, App will show all controllers in 'Device List'. In 'Device List, ',you can select controller you want to Control. How many controllers apps can sycn control is same as how many controllers app can sycn control is same as how many devices your Wifi router can support. In network mode , you can control all controllers which were connected to Wifi router no matter your Wifi router is online or not.

C. Remote control by Internet:

To control your WiFi controllers anywhere in the word. In network mode , you just need to keep your WiFi router online. Click the gear icon on the top left corner to enter the setting page, Choose your WiFi controller and select 'Remote Settings' in the pop up menu. Check the remote state option to change it from unopen', Once WiFi controller restarts, you can find it in the 'Remote tab in the 'Device List 'page.

Remarks:

1. We are always improve our app. Just update app, you will enjoy more new functions of smart Wifi controller.

2. If your Wifi Controller can' t work well, please feedback it to after sales service. Majority of problems can be solved by software

3. Don' t pour water or other liquids on the controllers.

FAQ:

(A)My phone cannot connects to Wifi controller in single mode.

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules.

Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and

(2) this device must accept any interference received, including interference that may cause undesired operation.

RF Exposure Information

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
