CHARGE & POWER ON

Connect your smartwatch to the included charger. Once it automatically turns on, tap the screen to begin and choose your language. Keep your smart watch charging during pairing and setup.

INPUT: 5V === 0.5A

WARNING: To avoid damage to your watch, only use it with included charger cord. Do not use a USB hub, USB splitter, USB y-cable, battery pack or another peripheral device to charge.

DOWNLOAD & PAIR

On your phone, enable Bluetooth™, then download the Wear OS by Google™ app. Open the app and follow the onscreen instructions to pair. Once paired, your smartwatch will give you an interactive tutorial.

USEFUL TIPS

Remember to turn on your phone's Bluetooth and keep the Wear OS by Google app running in the background to ensure your watch stays connected.

Continue to charge your smartwatch throughout the pairing process, as the initial setup can drain battery life.

Connect your smartwatch to Wi-Fi to download updates. These can take a few minutes.

RESOURCES & SUPPORT

To learn more about the Google services on your watch, visit: support.google.com/wearos
