Robust and Versatile

TurboFocus® Intelligent Focus System

Combines thermal contrast AF, laser-assisted AF, continuous AF, touch AF, and manual focus to deliver fast, accurate, and quiet focusing.

Seamlessly aligns thermal and digital images for precise analysis.

Visible light fusion thermal image (50% transparency)

Robust Design

- 2-meter drop impact resistance makes a truly enduring equipment;
- With an IP54 protection rating, this device is built for demanding industrial environments.

2-meter drop test

Meticulous Measurement Impeccable Imaging

±2%/±2°C
Accuracy

-20°C ~550°C
Measurement Range

Extraordinary Adaptability

Maintains ±2% accuracy under extreme temperature and high humidity conditions.

T-TWB®

Automatically adjusts the palette ribbon based on the pixel distribution across temperature ranges, offering a clearer view of temperature distribution for more efficient inspections.

IREdge®

Enhances object contours and edges to improve visibility and differentiation from the background.

Powerful Analysis, Swift Decision-making

Laser-assisted Area/Length Measurement

Equipped with a high-precision laser rangefinder, this system measures distances up to 50 meters with an accuracy of $\pm 0.01\% \pm 2\text{mm}$. It automatically calculates areas and lengths within the thermal image, ideal for building inspections and thermal loss assessments of large equipment.

On-device Analysis

Easily annotate images during inspections with the bookmark feature. Bookmarked images can be retrieved anytime for onboard analysis and streamlining your workflow.

Professional Analysis Software

AnalyzIR Venus software enables detailed data analysis, batch processing of inspection results, and instant report generation, enhancing the efficiency and professionalism of inspection workflows.
