Contents

Registration

After you open IP-INTEGRA Access application, Welcome screen is displayed (Picture 1-1). Press Scan QR Code

and scan QR Code received on email for automatic setup (Picture 1-2). After the QR Code is scanned, you will receive a verification code which should be typed in on the verification screen (Picture 1-3) and click on Verify.

3. Verification screen

Favorites screen

After successful verification, Favorites screen will be displayed (Picture 2-1). In the beginning, you will not have any favorite doors. After you add them (Adding the favorite doors will be explained further on in the document), the screen will look like the one in picture 2-2. To remove a favorite door, click on the X icon.

2. Favorites screen v2

Zones screen

After you click on the Zones in the bottom navigation menu, Zones screen will be displayed (Picture 3-1). On the screen, all zones to which you have access will be displayed. When you select wanted zone, all doors assigned to that zone will be displayed (Picture 3-2). In order to add doors as favorite, you should click on the star icon and it will change its color (Picture 3-3).

Settings screen

After you click on the Settings in the bottom navigation menu, Settings screen will be displayed (Picture 4-1). Under settings tab, you can enable 'Use Biometrics' option for extra security. That means you will need to confirm the action of opening doors by scanning your fingerprint. By clicking help, you will be redirected to IP INTEGRA web page. Basic information about application will be shown if you click on About.

You can log out from the application by using the Logout button. What Logout button does is it unlinks the device

from your account.

written permission.

Ways to open doors

There are two ways to open doors. First is to long press the door icon located either in Zones screen, or Favorites screen (if you added your favorite doors) (Pictures 5-1 and 5-2). When the door is successfully opened, you will receive vibration feedback and the icon will turn green (Picture 5-3). Second is to click on Scan QR code button shown in Favorites screen (Picture 5-1) and scan the door QR code.
