## FRUIT CHUTES SATS-MINI Sentinel Automatic Trigger System

## Introduction

Thank you for buying the SATS-MINI, our Sentinel Automatic Trigger System. These resources are on our website. Here are direct links to help you get started!

**WARNING:** Be sure to go through each section carefully. Let us know if you have questions. In the event of an emergency, an improperly rigged parachute can result in a crashed drone.

1. Using the SATS-MINI failsafe:

<http://bit.ly/32su0ce>

**Note:** Unless otherwise indicated, SATS-MINI are shipped preconfigured for the particular drone bundle it is shipped with. When purchased alone, the SATS-MINI comes loaded with the default configuration useful for most applications. No setup or software upgrades are needed. We do recommend downloading and installing the Windows UI program “Shooty Chute.” This lets you tune the settings as well as download and manage the black box flight log.
