## Battery cabinet assembly for C-20

- Taking out front & back board, then set the load bar to the bottom iron frame from top to down with one or two more bars.

- Fixing left and right boards. Put the batteries in this first layer.

- Note: keep tidy to avoid blocking the lateral board's slot

- Assemble second layer in the same way with left and right boards. And then, put batteries inside.

- Follow the same way to assemble batteries in the third and forth layers respectively.

- Setting right and left board in the way of step 2.

- Put top cover with top board to complete assembly
