- Weight: 160 g

Mode Selection

Power switch

Mode switch

The X1 Bluetooth game controller keyboard has a game controller and a touchpad/keyboard on both sides of the product, so you can select and use the function by sliding the mode switch.

- Power on with the slide power switch at the bottom of the product.
- The mode switch is located at the top of the keyboard side, and the keyboard function is selected to the left and the game controller function is selected to the right.

- After selecting the product function, connect to the device you want to use through a Bluetooth pairing process suitable for each mode.

Keyboard mode

Bluetooth connection

1. Power on, automatically waits for pairing when selecting keyboard mode, and select and connect the 'XI keyboard' searched on the device you want to use.
2. Press and hold the Fn and C keys together to disconnect the existing Bluetooth connection and connect to the new device.

(Fn+C, Manual Pairing)

- Mouse left button: R1 / Mouse right button: L1
- Fn + Spacebar: Switch the cursor movement speed (2 speeds)
- Fn + =key: The keypad backlight

If there is no operation within 5 minutes, the keyboard will automatically enter sleep mode. Press any key to release the keyboard from sleep mode.

Troubleshooting when bluetooth pairing disconnected (Keyboard mode)

1. The keyboard may be in power saving mode, press any key to make sure that the key is entered.
2. If no response, turn off the keyboard and turn it on to check if Bluetooth is automatically connected.
3. If Bluetooth doesn't connect automatically, please connect again to the device by pressing and holding the Fn+C key.

Game controller mode

MODE	Buttons (Press and hold)	LED color	Device layout (Pairing ID)	Compatible Device OS
B	MODE+B	Cyan	DUALSHOCK (Wireless Controller)	Apple, Android mobile / Mac,Win PC

The game controller supports five modes, connecting via Bluetooth pairing in a mode suitable for the OS in which the game is running. Each pairing mode is shown in the following table.

Troubleshooting when bluetooth pairing disconnected

(Game controller mode)

1. The game controller may be in sleep mode, so release the sleep mode by pressing the MODE button.
2. If no response, turn off the keyboard and turn it on to check if Bluetooth is automatically connected.
3. If Bluetooth is not automatically connected, please reconnect to the device according to each pairing mode.

FCC WARNING

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, under part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency ener, and if not installed and used in accordance withthe instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Note: The Grantee is not responsible for any changes or modifications not expressly approved by the party responsible for compliance. Such modifications could void the user’s authority to operate the equipment. The device has been evaluated to meet the general RF exposure requirement. This equipment complies with FCC’s RF radiation exposure limits set forth for an uncontrolled environment. This device and its antenna(s) must not be co-located or in conjunction with any other antenna or transmitter.
