Futaba GY701 Data Copy Tool

Product Information

- Product Name: GY701/CGY750V2.0 Data Copy Tool
- Model Number: 1M23Z03008

Features

The GY701/CGY750V2.0 data copy tool allows you to store and transfer setting data between the GY701 or CGY750V2.0 and your PC.

Caution: The data copy tool is compatible with the following firmware versions of the GY701 and CGY750V2.0:

- GY701 Ver: 1.10 or later
- CGY750 Ver.2.00 or later (Please use the previous version for
- Ver.1.20 – 1.40. For CGY750 Ver.2.0 and later, the previous version may not work correctly.)

Connection

1. Connect the CIU-2/CIU-3 to the USB connector of your PC and the other end to the S.BUS input terminal of GY701/CGY750V2.0.
2. Supply power to GY701/CGY750V2.0.

Note: Prior to operation, make sure to install the PC drivers of the CIU-2/CIU-3 to your PC and decompress the downloaded GYLink software.
Product Usage Instructions

Storing Setting Data to PC

1. Run the GYLink.exe software that you downloaded.
2. A dialogue box will appear when GYLink starts properly.
    - If the PC cannot recognize the CIU-2/CIU-3, an error message will appear. In this case, check the proper connection of the CIU-2/CIU-3 and ensure that the PC driver software is installed correctly.
3. Click the [READ] button on the box.
    - The PC will prompt you to select the destination folder and file name for storing the data.
    - Choose the desired folder on your PC and click the [Save]button. The box will show [Now reading…].
4. Once the reading process is complete, the box will display the model type and ID number.
    - If you encounter a read error message or the box does not show the ID number, ensure the wire connection and power supply are correct, and then retry the reading process.

Transferring Setting Data to GY701/CGY750V2.0

1. Run the GYLink.exe software that you downloaded.
2. A dialogue box will appear when GYLink starts properly.

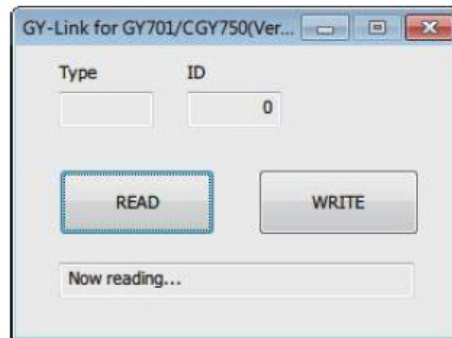

- If the PC cannot recognize the CIU-2/CIU-3, an error message will appear. In this case, check the proper

connection of the CIU-2/CIU-3 and ensure that the PC driver software is installed correctly.
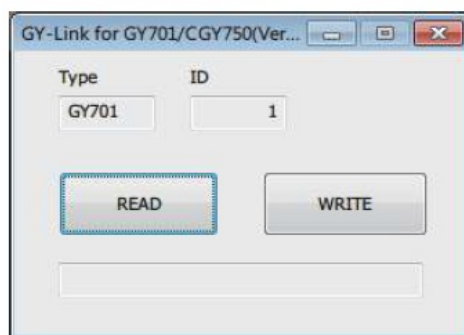

3. Click the [WRITE] button on the box.
   - The PC will prompt you to select the destination folder and file name for the data transfer.
   - Select the file name and click the [Open] button on the box. The box will show [Now writing].

4. Once the transfer is completed, [The writing succeeded] will be displayed.

   - If a writing error message appears, try the writing process again.
