UEZGUI-4357-70WVN 7.0" PCAP Touch Screen LCD GUI Development Kit

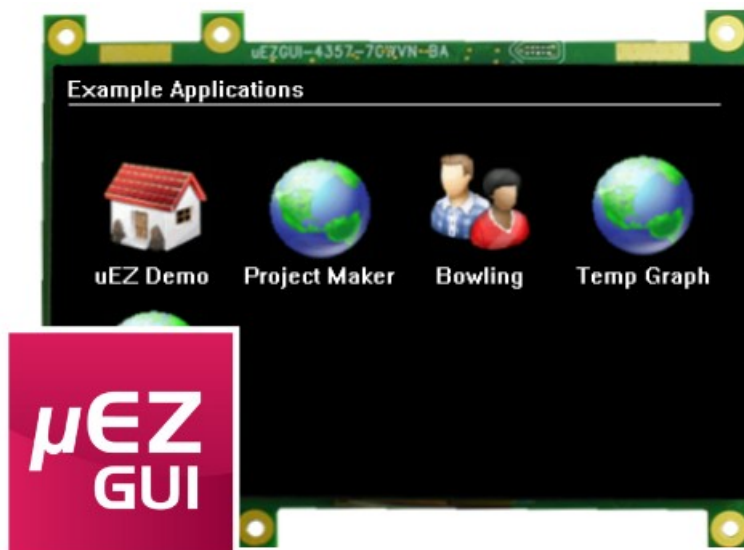

Congratulations on the purchase of your µEZ® GUI development kit!

Our goal is to ensure you have a pleasant experience familiarizing yourself with the functions and capabilities of our products.

To Begin Development with your µEZ GUI:

1. Power on the device by connecting the 5V power adapter to one end of the USB cable and the other end to the µEZ GUI. Note: Do not connect the µEZ GUI to a computer USB port. Standard 2.0/3.0 USB ports will not provide sufficient power to the device.

2. Visit [TeamFDI.com/StartHere](https://www.teamfdi.com/starthere) to download the UEZGUI-4357-70WVN Start Here Guide. This guide will provide step-by-step instructions and supporting files for designing your first graphical user interface.

UEZGUI-4357-70WVN Kit Contents
