GALPHI 3 Channel Dash Cam Front and Rear Inside User Guide

GALPINI 3 Channel Dash Cam Front and Rear Inside

Dear Customer.

Thank you for choosing M2-3 Channel dashcam. If this is your first dash cam purchase, then you have made the right choice in protecting yourself and your family. It's the best small investment you can do that goes a long way. Dash cameras can be tricky at first on how they are designed to work. But once you understand it, trust me it is super easy to operate and fun to use.

QUICK START GUIDE
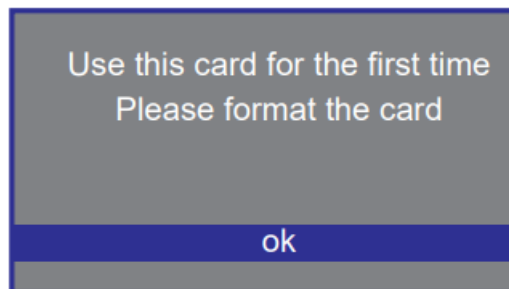

Insert a correct SD card

SD card is not included in the package, Please insert only brand name Class-10, U3 speed Micro-SD card up to 64 GB max. You can purchase an SD card from amazon.com by Searching B06XX29S9Q. Amazon Link:
https://www.amazon.com/dp/B07349L1WS

Or you can contact us to apply for a free one as we are in promotion activities currently

Always connect to power

Make sure to keep the camera plugged into power for daily use because the internal battery is designed to save your personal settings.
REMINDER: Please use the provided charger to ensure enough power to run 3 channel system.

Format Reminder

When the memory card is inserted into the camera for the first time, you need to press toOK let the camera recognize the SD card, and a format reminder will prompt up, just press again and then cameraOK will auto start recording after the SD card is successful-ly formatted. For daily formatting via the dashcam, please see the user manual on page 16 for detail.

Need Record for 24 hours?

M2 supports 24 hours recording only when it is connected to a TYPE C USB hardwire kit(not included in the package) and Time Lapse record is turned on(see the user manual on page 27). Please go to amazon.com search B09SPN811C, or visit amazon link:
https://www.amazon.com/dp/B09SPN811C
Or you can contact us to apply for a free one as we are in promotion activities currently
