LED Descriptions

1. The connection of controller order

The connection of controller order will correspond with the LED order of wireless controller GN PROX-4M. (For example, when the LED is on in the first frame, it represents that corresponds with the first controller.)

2. State of Charge:

Charging when the controller is not connected with the Switch console, 4 LED will on with flashing. The LED will stop flashing and lights out after the controller is fully charged. Charging when the controller is connected to the Switch console, the LED of the corresponded controller will be on with flashing.

3. Low battery indicator When it is connected with the Switch console, the LED will be on with flashing slowly.

4. Pairing mode indicator:

If connected successfully, the LED will light on; if fail to connect, the LED will keep flashing.

5. When connecting with computers:

The LED lighting on the 1+4 frame represents Xinput mode (default), lighting on the 2+3 frame represents Dinput mode.

— Notice

When the controller is in low battery, the LED will on with flashing slowly. If it wasn't be charged for a long time, it may not be activated.

ITEM MODEL

ITEM MODEL: GAME'NIR GN PROX-4M Dual Vibration Wireless Controller (wake-up version)

PLAYING TIME: 8-10 hours / 600 hours of standby time.

CHARGING TIME: 2-3 hours

FUNCTIONS: Wake up Switch console, 2 modes of the combo, 6D dual vibration, 6-axis somatosensory, dual analog stick, NFC/Amii-bo, auto-sleep mode.

PACKAGE CONTENTS: Switch wireless controller, Type-C charging cable, user manual

BATTERY CAPACITY: 600mAh U-ion Battery

SIZE: 15.4 x 11.1 x 5.9 cm

WEIGHT: 195 g MATERIAL ABS new strengthen

RANGE OF BLUETOOTH: 10 meters

VOLTAGE: USB DC 5V PLATFORMS Switch, PC/STEAM (need to connect with Type-C Cable)

CHARGING PORT: Type-C

COUNTRY OF ORIGIN: China(Design By Taiwan)

QUALITY CONTROL: GAME'NIR Taiwan

FCC Caution

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and

used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC ID: 2A2VT-GNPROX4M

FCC RF warning statement:

The device has been evaluated to meet general RF exposure requirements.
The device can be used in portable exposure conditions without restriction
