PAIR WITH USB RECEIVER

The receiver has been paired with the controller before leaving the factory, If the receiver cannot be properly connected to the controller during use, please use the following method to repair

1. Plug the receiver into the USB port of the connected device and click the receiver's Pair button. The receiver's indicator will blink fast to indicate pairing status is entered.
2. When the controller is turned off, press the X+Home buttons until the Home button blinks green. Then hold the controller's Pair button until the Home button blinks fast and wait for the controller to pair with the receiver.
3. After a successful connection, the receiver's indicator will be solid white, and the controlled Home button stays solid.

CONNECT TO YOUR PC VIA USB RECEIVER

1. Plug the receiver into the PC's USB port
2. When the controller is turned off, short press the X+Home buttons. The Home button will blink slowly to enter the reconnection status. Wait for the controller to pair with receiver.
 - The next time you use it, just short press the Home button to power on, and the controller will enter the reconnection status to connect automatically.
 - If the controller was not connected using the X+Home buttons last time. it needs to be turned on using the button combinations.

CONNECT TO YOUR DEVICE VIA USB CABLE

Use the included USB—C cable to connect the controller to Switch.

- To connect to Switch, go to Switch's Home Menu, tap System Settings>Controller and Sensors>Pro Controller Wired Connection and set it to "On".
- In Switch mode, the values of the A button & B button, and X button & Y button of the controller will be swapped.

CONNECT TO IPHONE VIA BLUETOOTH

1. When the controller is turned off, short press the B+Home buttons to power on. The Home button will blink quickly.
2. Turn on the the phone's Bluetooth, click Xbox Wireless Controller and pair.
3. The Home button will become solid blue to indicate a successful connection.
 - The next time you use it, just short press the Home button to power on, and the controller will enter the reconnection status to connect automatically.
 - If the controller was not connected using the B+Home buttons last time, it needs to be turned on using the button combinations.

CONNECT TO ANDROID DEVICES VIA BLUETOOTH

1. When the controller is turned off, short press the A+Home buttons to power on. The Home button will blink fast.
2. Turn on the the phone's Bluetooth, click GameSir-Cyclone Pro and pair.
3. The controller's indicator will become solid yellow to indicate a successful connection.

- The next time you use it, just short press the Home button to power on and the controller will enter the reconnection status to connect automatically
- If the controller was not connected using the A+Home buttons last time, it needs to be turned on using the button combinations.

CONNECT TO SWITCH VIA BLUETOOTH

1. Go to Switch's Home Menu, select "Controllers" -> "Change Grip/Order" to enter the pairing interface.
2. When the controller is turned off, short press the Y+Home buttons to power on. The Home button blinks fast to wait for pairing.
3. The Home button will become solid red to indicate a successful connection.
4. The next time it connects to Switch, just short press the Home button and the console will wake up.
 - If the controller was not connected using the Y+Home buttons last time, it needs to be turned on using the button combinations.
 - In Switch mode, the values of the A button & B button, and X button & Y button of the controller will be swapped.

BACK BUTTONS SETTINGS

NO PRESET BUTTON VALUES

Programmable as single or multi—button (up to 16)

Can be programmed to A/B/X/Y/LB/RB/LT/RT/LS/RS/View/Menu/Home/Share Button/D-pad/Left Stick/Right Stick

1. Set the L4/R4 button value: Hold the M+L4/R4 buttons simultaneously until the Home button blinks white slowly. Press the button(s) you want to program to L4/R4 (single/multi-button supported), then press the L4/R4

button. When the Home button returns to the mode color, the L4/R4 button value is set.

- For multi—button, the interval time of each button will be triggered according to the operation time when programming.
2. Cancel the L4/R4 button value: Hold the M+L4/R4 buttons simultaneously until the Home button blinks white slowly, then press the L4/R4 button. When the Home button returns to the mode color, the L4/R4 button value is canceled.
 - After IOS of inactivity when setting, the controller will automatically exit the setting mode and the button value will remain the same.

TURBO FUNCTION

4 gears in total, Slow 12Hz/Middle 20Hz/Fast 30Hz/Off Configurable buttons: A/B/X/Y/LB/RB/LT/RT

1. Turbo setup: Hold the M button, then press the button that needs a Turbo setup to enable the Slow gear Turbo. Repeat this operation to cycle through the Turbo gear (Slow, Medium, Fast, Off).
2. Clear all Turbo buttons: Double tap the M button.
